

### **NHS Faculty to Serve on Colorado Model Content Standards Subcommittees**

Two UNC faculty members, Dr. Robert Powers, who teaches mathematics and mathematics education in the School of Mathematical Sciences, and Teresa Higgins, who teaches science and science education in the School of Biological Sciences, have been selected to serve on two Colorado Model Content Standards Subcommittees, one for mathematics and the other for science. The Subcommittees are charged by the Colorado Department of Education with updating the K-12 mathematics and science standards in Colorado so that they include 21st century skills. The Colorado State Board of Education is planning to adopt revised content standards in December.
