Primary Text:  First-Order Principles for College Teaching by Robert Boice, Anker Publishing Company, Inc. 1996

Course Objectives:

• Address curricular, pedagogical, and ethic issues in college mathematics teaching

• Reflect on and discuss ways to improve and reform teaching

• Assist one other on current concerns and issues, as they arise in their first college teaching.

Evaluations:

The grades obtained from this one semester hour course are either S or U. A grade of "Satisfactory" will be achieved be successfully completing the following.

• Attending 85% of the scheduled classes

• Participating in class discussions of readings from text

• Participating in discussions of classroom experiences of the semester

• Presenting a quality paper on what was most successful, what was learned in this first college teaching experience, and what changes would be made in teaching the course again
