

Name:

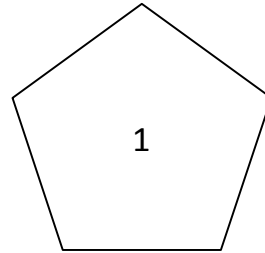

## It's All in the Choice of Unit

---

1. Illustrate the following fraction addition problem using the given shape as the unit.

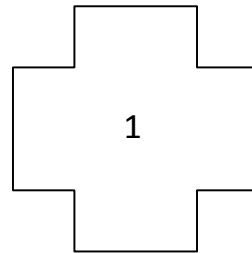

(Hint: Draw 3 shapes-- one for each fraction, and one for the answer).

$$\frac{2}{5} + \frac{1}{2}$$

2. Illustrate the following fraction subtraction problem using the given shape as the unit.

$$\frac{1}{4} + \frac{5}{6}$$

3. Think-up a challenging fraction addition problem. Then use a fun shape (not a circle or rectangle) as the unit in order to illustrate the solution.
