FACULTY PROFILE

RESEARCH

UNC research and sponsored programs, amounting to

\$17.5 million

in external funding over the past three years, include a range of topics that address serious issues in society.

FACULTY RESEARCH EXAMPLES

Developing a drug that can stop replication of West Nile virus

Dr. Scott Franklin and his students look at the effects of natural and manmade disturbances—from wildfires to fracking—on ecosystems from the Rocky Mountains to Colorado's eastern plains.

Developing computer models for traumatic brain injuries to inform helmet safety

Raising awareness of noise-induced hearing loss and prevention — especially for people who listen to music with earphones, and tree service workers and operators of other outdoor equipment

Dr. Karen Barton, a UNC geography professor and Fulbright Scholar, works with her colleagues, students and the community to study food deserts in Colorado, and helps community members find common ground on often polarizing issues.

At the UNC Cancer Rehabilitation Institute, Dr. Reid Hayward and his colleagues and students study effects of exercise on cancer patients undergoing chemotherapy, improving quality of life and showing the cardioprotective benefits of exercise in countering the side effects of chemo.

Collaborating with local educators to help beginning elementary teachers deliver high-quality mathematics and science instruction in high-need districts

Building multi-state networks in academic, governmental and community settings to support the employment outcomes, independence, and quality of life for people with disabilities

Operating an 11-state regional center to train interpreters for individuals who are deaf or hard of hearing and individuals who are deaf-blind

Delivering a research-based, baccalaureate degree program in American Sign Language-English Interpretation
