Frequently Asked Questions regarding the Classroom Performance System (CPS)

Blackboard

Are students required to register their personal response pads ('clickers') in Blackboard in order to use them in my class?

Students must register their pads for them to be used in your class, and that is done either through Blackboard or CPSOnline. If you plan to sync information from CPS with Blackboard, your students MUST register through their Blackboard accounts. If not, they should register through CPSOnline at www.einstruction.com. It is very important that students use the correct procedure for pad registration, depending on whether or not Blackboard is used for the class!

Can I consolidate two CPS/Blackboard sessions into one session in Blackboard?

Yes, you can. You need to contact the Alma or Li at CETL.

I cannot register my clicker through Blackboard because when I choose one of the two fees options, I land in a pop up window that comes up with nothing.

Check your Browser (Internet Explorer, or Firefox) and make sure you have turned off the pop-up blocker. (If you are seeing Turn On Pop-up Blocker displayed in 3, that means you have turned the blocker off, and you do not need to change anything now.) The following image gives you an example of how Pop-up blocker may interfere with students' clicker registration.
