

Flow Chart for CPS eInstruction Adopters

You should have ordered clickers for your students from the bookstore and sent Li your course(s) information at this point. Then go to <http://www.einstruction.com/Downloads/index.cfm> to download and install CPS software on your computer.

Receive email from eInstruction containing Instructor setup code, and instructor kit shipped to you. In Blackboard, instructor setup code may be prefilled for continuing users of eInstruction. So, in Blackboard, Instructor setup code may **Not** be needed if you register classes through Blackboard.

With the class key, students will register their clickers through CPS online by following the [handout](#) on CETL website.

Retrieve instructor class key and email or give it to your students in class.

Go to einstruction.com login page, follow [instructor set up guide](#) at CETL website and register classes there.

Since you do not use Blackboard, you must set up your test response pad through a **student account** in CPS online. Use the enrollment code in the box shipped .

Since you use Blackboard, you may need to register your demo student clicker (response pad) in Blackboard. Contact Alma at CETL to add your clicker as a demo student in Blackboard.

Log on to Blackboard, Go to Tools, and choose CPS Connect to create class. Follow the [instructor set up guide](#) at CETL website.

Instruct your students to log on Blackboard to register their pads by following the [handout](#) on CETL

Decision Point
Use Blackboard for the course(s)?

No

Yes
