PREVENTING SLIPS, TRIPS AND FALLS

Good Housekeeping

- * Keep clutter out of work areas
- * Keep equipment in its proper place
- * Keep walkways and aisles clear
- * Wipe up spills immediately
- * Discard trash
- * Close drawers & cabinets after use

Fall Prevention Checklist

- * Avoid bending, twisting and leaning backward while seated
- * Always use a stepladder for overhead reaching
- * Report loose carpeting or damaged flooring
- * Never carry anything that keeps you from seeing where you're going
- * Use handrails on stairs

If you find yourself heading for a fall, remember to roll, not reach. By letting your body crumple and roll, you're less likely to get injured. Reaching out to break your fall may cause you to break an arm or a leg. If you fall, slip or trip, report it immediately, even if it's minor.
