

UNIVERSITY OF NORTHERN COLORADO

ANNOUNCES NEW

ADOPT-A-SPOT PROGRAMS

Adopt-A-Spot is a program designed to encourage community ownership of our wonderful campus and to prevent littering through beautification and maintenance. The Department of Landscaping & Grounds feels that a cleaner and more beautiful university campus is a great asset in attracting students, faculty and staff and businesses to our area while instilling a greater pride in our campus community.

Join the University to beautify its streets with an Adopt-A-Spot Beautification and Campus Cleanup partnership. Your friends, co-workers, department and campus organizations can partner with Facilities Management to assist in enhancing our campus landscape.

The University has identified flowerbed locations available for adoption and street and parking lots that you can adopt for monthly clean-up activities.

We invite you to contact ***Landscaping & Grounds*** for specific spots that need adoption. You will find applications on our web page, too! You may contact us (970-351-1263) or your SPEEC or PASC representative to learn more or check out the Facilities Management Website: ***www.unco.edu/facility/landscaping***
