3-3-501 Curriculum Approval Process. The purpose of the curriculum approval process is to ensure the integrity and quality of academic programs through a collaborative effort between faculty and administration. The process described below recognizes the important but different roles played by those groups. The faculty’s role and responsibility is to develop and deliver academic programs and curriculum. The administration’s role is to assure that curriculum proposals are appropriate to the disciplinary responsibility of the unit and the University and that adequate resources are available to implement proposed curriculum.

3-3-501(1) Responsibilities of the Originating Unit. Curriculum changes originate with faculty members in the appropriate academic unit, program areas, schools, or colleges. Units include multi-disciplinary programs, program areas, schools, and colleges. Each academic unit shall establish a curriculum committee consisting of all the faculty in the program area or a proper subset thereof.

3-3-501(2) Curriculum Change Procedures

(a) General Provisions

   (I) There are three types of curriculum changes (minor change, variable title, major change), each with its own set of procedures outlined below for those programs housed in single colleges.

   (II) For those programs of study not housed within a specific college, the Undergraduate Council or Graduate Council as appropriate will take the place and assume the same responsibilities as the College Curriculum Committee. Once this step is completed, the originating unit will send curriculum change proposals to the Chief Academic Officer (CAO).
