

Physics & Astronomy SEMINAR

Starquakes, Wi-Fi Lawsuits, Kangaroos, and Airports A Career In Astronomy

What do starquakes, lawsuits over Wi-Fi technology, kangaroos, and airports have in common? They are all key parts of Dr. Charles Kuehn's journey in astronomy that led him to UNC. Dr. Kuehn will talk about how studying starquakes can let us learn about the interior of stars, stellar evolution, and the formation of the Milky Way. He will also talk about his journey from undergrad student to professor, offering some insights based on success, failure, and luck.
