

Physics & Astronomy SEMINAR

FRIDAY MARCH 4 3:30PM ROSS 0220

**Choose Your Own Adventure:
Astro Edition**

Kaitlyn Raub
MITRE Corporation

From working for one of the largest observatories in the world to building telescope systems for the government, the range of what one can do with an Astronomy degree is endless. Kaitlyn Raub will talk about her career since graduating UNC and the science she has gotten to be a part of. Additionally, as an early career/recent graduate student, she will talk about the job interview process and what individuals can do now to set themselves up for their future.
