

Summer 2008 Budgets

Summer budgets are based on the exact number of credits you are registered for and the session(s) you are enrolled in; 6 week, 8 week, 12 week or a combination of the three. Undergraduates are full time at 12 or more credits and graduates are full time at 9 or more credits. Half time for undergraduates is 6 credits and 5 for graduates. The chart below contains budgets for exactly half time and exactly full time for undergraduates and graduates, non-residents and residents, WUE and Commuters. The budgets are also broken down for 6, 8 and 12 week sessions. If you are taking credits that fall between half time or above full-time, your budget will be adjusted accordingly, for example: the budget for an undergraduate student taking 8 credits in a 12 week session will not appear on the chart below; however, a separate budget exists for that scenario and for all other scenarios that don't fall within the chart. Please contact the Office of Financial Aid for a specific budget based on your summer enrollment.
