

Job Placement Rates

In 2010, the University of Northern Colorado Assessment Office conducted a survey to determine the employment status of recent graduates. Due to the low response rate (22%), a follow-up Career Services Alumni Survey will be sent to graduates by the Assessment Office at UNC this year.

2009-2010 Alumni Survey - ISET													
Academic Program	Total Grads ⁵	Respondents ⁵		Obtained full-time employment within 12-18 months after graduation		Job related to UNC undergraduate major?		Well-prepared for job by major ⁷		Attending graduate school full-time		Placed ⁷

⁵May include individuals with more than one major

⁶Includes creative drama and visual arts

⁷Includes sum of those employed full-time and those not employed, enrolled in graduate school full-time

*Includes individuals with more than one major

The survey data shows that teacher candidates who were majored in Biology, Civics, Earth Science, ESL, and Geography had 100% of placing rate within 12-18 months after graduation. Candidates who were majored in History, Languages Arts, Mathematics, and Multicultural Studies had over 80% of placing rate within 12-18 months after graduation. However, candidates who were majored in Fine Arts and Spanish had only 50% and 33% of placing rate within 12-18 months after graduation, respectively. Due to the low reposes rate, the survey results must be interpreted with caution.
