

Special Programs

Student Move In

During student move-in Facilities Management place cardboard collection cages near the resident halls for recycling. These cages are typically located near trash enclosures and are emptied multiple times per day. All cardboard must be flattened and all packaging materials must be removed, before being deposited in the collection cages.

Event Recycling

Facilities Management provides recycling containers for any event on campus upon request. [Event Requests](#) can be made through event planning when making an event reservation.

Facilities Management Recycling provides special event services to the cultural houses for their many community celebrations, to all of the sporting events, and other large scale events, such as Special Olympics.

Campus Surplus

If you have a desk, chair, cabinet, table or any other un-wanted furniture or equipment simply contact the Service Center at 351-2446 or submit a [TMA Work Request](#) to schedule a pick up.

Work orders are scheduled in the order they are received so please plan ahead when making a request.

Remember the furniture collected can also be re-distributed so stop by when you are in need of materials for your space.

We are located in Parsons Hall and are open every Wednesday from 10:00am to 11:30am.

End of Semester Donations

Every spring (the first Saturday after Spring Commencement) the Classified Staff Council, Housing & Residential Education, and Student Activities team up for a yard sale. Students living in the residence halls are given an opportunity to donate items to the yard sale effort.

Donations are also welcome from the campus community. This helps to reuse clothing, house wares, small appliances, games, etc., that would otherwise find a way into a landfill. Sold items raise funds for both Student activities and the Classified Staff Council (CSC) Scholarship fund, and unsold items are donated to local charities.

Questions regarding the yard sale should be directed to the [Staff Council chair](#).

Additional Requests

For additional recycling needs and requests please contact the Service Center at 351-2446.
