The rules in the formatting guidelines of this manual take precedence over all other manuals and must be used in conjunction with programs’ preferred style manual. This manual is provided by the Graduate School and International Admissions of the University of Northern Colorado. No publication manual can anticipate all potential questions that students may have. Staff members in the Graduate School will be happy to respond to students’ questions. Please direct inquiries to:

General Information

This manual is organized by topic areas to facilitate easy location of information needed to format and submit a final dissertation or scholarly project. Most the formatting requirements are the same regardless of whether a student is writing a dissertation or scholarly project. Differences among the types of documents are noted in the formatting manual where relevant. Refer to the Appendixes for examples.

Hiring a Typist

If you choose to employ an editor or typist, you are responsible for selection of, payment to, and communication with the contracted typist. The Graduate School maintains a list of typists who have extensive experience with our guidelines. This implies no endorsement of listed typists, nor are students restricted to employ these particular typists; however, the typist you hire must follow the UNC Graduate School guidelines. It is your responsibility to clearly define to the typist the expected work, whether it is a full edit, formatting, or somewhere in-between. Before hiring a typist or editor, see a list of questions to ask yourself and prospective typists/editors on the Graduate School website.

A competent typist has up-to-date equipment in good repair and works with the author to ensure reflection of the Graduate School specifications for the dissertation. Make the instructions to the typist precise and include the title and version of the style manual your program follows, as well as the style manual from the Graduate School. It is your responsibility to ensure that the typist has the appropriate style manuals required by the school and content area. We expect ongoing communication to define the role of the typist. The student must approve and proofread the work prior to turning it in to the Graduate School.

Safety and Academic Integrity

Research with human participants. All research projects conducted under the auspices of the university (e.g. by faculty, students, or staff) involving human subjects must be reviewed and approved by the university’s Institutional Review Board (IRB). Faculty, students and staff planning human research must submit requests for IRB approval prior to any data collection. (Institutional Review Board website.)

If your research involves human participants, refer to the Office of Sponsored Programs website for application and IRBNet instructions, http://www.unco.edu/research/research-integrity-and-compliance/institutional-review-board/. Include the IRB Approval letter, found in your IRBNet Board documents, in the appendix of your dissertation or scholarly project.

Research with animal subjects. If your research involves animal subjects you are required to submit an application to the Institutional Animal Care & Use Committee (IACUC), signed by their Research Advisor, and receive approval prior to beginning
research involving animal subjects. If you are doing animal-related research, refer to the website for Institutional Animal Care & Use Committee (IACUC) at http://www.unco.edu/osp/ETHICS/iacuc/iacuc.htm. Include official documentation of an approved IACUC application in an Appendix of your thesis.

**Use of copyrighted materials.** Use of copyrighted materials in your dissertation or scholarly project requires permission from the copyright holder in the Appendix and reference to the permission in the Acknowledgements section. For additional information regarding requirements for copyright permission and definitions of “fair use,” go to the following website: www.copyright.gov/FLS/fl102.html. ProQuest also provides a description of copyright regulations specifically for theses and dissertation as well as an example of the content to include in a copyright permission letter in the following document: http://media2.proquest.com/documents/UMI_CopyrightGuide.pdf.

**Plagiarism.** “In order to encourage and foster academic excellence, the University expects students to conduct themselves in accordance with certain generally accepted norms of scholarship and professional behaviors. Because of this expectation, the University does not tolerate any form of academic misconduct. Academic misconduct includes but is not limited to plagiarism, cheating, fabrication, and knowingly or recklessly encouraging or making possible any act of plagiarism, cheating, or fabrication. Academic misconduct is an unacceptable activity in scholarship and is in conflict with academic and professional ethics and morals.” (UNC Dean of Students Office Code of Conduct section D; http://www.unco.edu/dos/academicIntegrity/AcademicMisconduct.html).

The related issue of self-plagiarism occurs when students duplicate their own words extensively without appropriate reference to the previous work. Students found to have plagiarized material or text within their dissertation or scholarly project may be subject to an "F" on the work in question or other academic penalties as explained in the Dean of Students Code of Conduct, and may result in revocation of the graduate degree.

**Format Structure Options**

Below are brief descriptions of the three options currently available at University of Northern Colorado for structuring doctoral dissertations and scholarly projects. If the traditional five-chapter model does not fit your study, you may consider the options below. Work closely with your Research Advisor and committee members to determine the appropriate structure for your dissertation. If your program has a specific layout or structure, you are expected to follow the program's guidelines.

**Traditional Format**

The body of the traditional format for a study consists of five chapters:

- Chapter I –Introduction to the Study
• Chapter II – Review of the Literature

• Chapter III – Methodology

• Chapter IV – Results

• Chapter V – Discussion and Conclusions

Journal Manuscript Format

This format contains two or more chapters as separate journal manuscripts, with each manuscript addressing two separate identifiable, underlying themes or lines of research within the overall study. It will include five to six chapters:

• Chapter I – Introduction, explains how the individual studies are related.

• Chapter II – Review of Literature, a comprehensive exploration of the framework underlying the dissertation research. Alternatively, the material from Chapters I and II may be combined into a single chapter, e.g., “Introduction and Review of Literature.” If so, change subsequent chapter numbers accordingly.

• Chapter III – Methodology, an in-depth description of the research design(s) and methods.

• Chapter IV and V – Journal Manuscript Titles will be specific to your studies - a minimum of two stand-alone manuscript chapters are required for dissertations using the journal manuscript format. Text in the manuscript chapters will likely duplicate material included in the first three chapters of your dissertation. The goal is having a journal article "ready to go" to a journal for consideration.

• Chapter V or VI – Results, provide an overall summary of the work and a synthesis of results across the two or more studies.

Unique considerations for the journal manuscript format. Manuscript chapters included within UNC dissertations or scholarly projects must represent work conducted by the student while enrolled in a UNC graduate program and cannot have been used to obtain another degree.

Abstracts. Include an overall abstract for the dissertation. You have the option of including a separate abstract specific to each journal article in addition to the overall abstract of the dissertation. The journal article abstract would be more focused on the one topic than the broader spectrum of the dissertation abstract.
Acknowledgements. Include only at the beginning of the dissertation or scholarly project and not in the separate chapters or manuscripts.

Authorship. The student must be the sole author or first co-author of each article submitted as a manuscript chapter. Works co-authored with one or more faculty must include a summary of the contributions made by the student and by the faculty author(s) on the chapter title page. If you include a previously published article that has multiple authors, you, the student, must obtain permission from all co-authors before including the article in the dissertation. While it is not necessary to include co-author permissions in the dissertation appendix, you should send a copy to the graduate school and retain copies of such permissions for your personal records.

Copyright release. Before including published or accepted for publication articles in your dissertation or Scholarly project, obtain a copyright release or permission from the journal or publisher. Include a note on the first page of chapter acknowledging previous publication of the material. The Graduate School will not accept a dissertation or Scholarly project for final submission without receipt of the copyright release(s). Manuscripts under review or that have not been submitted for publication do not need a copyright release.

Table of contents. List the Contributions of Authors and correlating page numbers in the main dissertation or Scholarly project table of contents. You will not include a table of contents within the journal manuscript chapters.

General formatting. All formatting requirements for the manuscript chapters are identical to those of the non-manuscript chapters. For example, apply the same margins, line spacing, heading styles, and editorial styles (e.g., APA style, Chicago style, etc.) throughout, regardless of the editorial style guidelines in targeted journal(s). Maintaining uniform formatting throughout the document not only establishes that the UNC dissertation or scholarly project represents a unified body of work but also facilitates a professional appearance of the overall document. Digital reproductions or reprints of previously published manuscripts are not acceptable in the dissertation or scholarly project.

Reference list. Include a comprehensive reference list at the end of the dissertation or scholarly project which includes all references cited in the entire dissertation or scholarly project. In addition, you may choose whether or not to include separate journal manuscript reference lists in the manuscript chapter(s) which include only the sources from that article.

Alternate Format

Some researchers prefer to organize and present their work in formats that are either unique to a certain discipline or that more effectively communicate the research based on a particular paradigm. For example, a student conducting a qualitative study may decide, with endorsement from his or her advisor and committee members, to
arrange the presentation of the “results” into separate chapters organized around individual case studies or separate themes revealed in the course of the study.

Alternate format requests need to explain the alternate style, including rationale and an outline or pertinent examples. Send the request to the Thesis and Dissertation Specialist at the Graduate School, copying the student and research advisor. Obtain approval from the Graduate School before writing begins. Format and other guidelines within this manual apply to the alternate format unless specified in the Alternate Format Request.

**Doctor of Audiology (AuD) Scholarly Project**

All Audiology Scholarly projects contain five chapters organized in the traditional format recommended for doctoral dissertations. For additional details about the Scholarly project process and content, refer to *The Doctor of Audiology (AuD) Handbook*. Students completing the Scholarly project must adhere to the editorial style requirements of the most recent edition of the American Psychological Association (APA).

**Doctor of Nursing Practice (DNP) Scholarly Project**

DNP scholarly projects comprise five chapters, as follows:

- Chapter I – Background, problem, potential significance of the study, and the review of literature.
- Chapter II – Purpose, objectives, and description of the project.
- Chapter III – Evaluation and analysis plan.
- Chapter IV – Results and outcomes.
- Chapter V – Recommendations and implications for practice.

For additional details about the structure and content of the DNP scholarly project, consult the *Doctor of Nursing Practice Scholarly project Handbook*, found on the School of Nursing website. Students completing a Doctor of Nursing Practice (DNP) scholarly project must adhere to the editorial style requirements of the most recent edition of the American Psychological Association (APA).

**Overall Format Requirements**

Typeface affects the physical appearance of a manuscript more than any single element. The following style parameters are mandatory for all UNC Graduate Publications, even though they may conflict with program style manuals. *Do not copy* format from a previously published dissertation or Scholarly project project in lieu of an
up-to-date style manual and the current version of the *Doctoral Dissertation and Scholarly Project Format Manual*.

**Font Size and Style**

- Use the same size and style font throughout the entire document, including page numbers, size 12, Times New Roman or Arial are preferred.

- Within long tables, you may use no smaller than 8 point font. Keep the table number, title, and figure number and captions the same size as the rest of the dissertation or scholarly project.

- Use bold and italicized font sparingly within the body of the dissertation or scholarly project, mainly for headings, as required by style manual guidelines.

**Margins**

- Left margin 1.5 inches on all pages of the dissertation or scholarly project

- Top, bottom, and right margins 1 inch with the exceptions of:
  
  - The first page of each chapter and new section, start 2 inches from the top of the page, 1 inch below the 1 inch margin setting. (Space down, don't change the margin on these few pages.):
    - Signature Page,
    - Abstract,
    - Acknowledgments,
    - Table of Contents,
    - Lists of Tables/ Figures,
    - Chapters,
    - References, and
    - Appendix title pages.

  - Bottom margin may appear larger due to widowed or orphaned lines.

- Landscaped Pages - The top of any landscape page must have the 1.5 inch margin. Format landscaped pages in the pdf version of your thesis so electronic readers do not need to turn their device to read.

- Do not justify the text - keep right side of the text jagged rather than even.

- Do not use a running head (the title or author name at the top or bottom of each page).
Paragraph Settings

- Double-space (only 1 blank line between lines of text.) Do not add extra space between paragraphs.
- Paragraph indents set at ½ inch.

Widowed and orphaned lines.

- When you must divide a paragraph at the end of a page, place at least two lines at the bottom of the page and at least two lines at the top of the following page.
- Do not leave a heading at the bottom of a page without the related paragraph – move heading to the following page so it stays with the paragraph.

Line spacing.

- Double-space the narrative of the manuscript (one blank line between lines of text.) with these exceptions:
  - Block indent and single-space Hypotheses and Research Questions
  - Block indent quotes longer than three lines.
  - Single-space footnotes, table titles, and figure captions.

Figures, Examples, and Tables

- Figures, examples, and tables follow within one page of the related discussion.
- Text and tables, figures or examples may appear on the same page, however, do not break into the middle of a sentence or paragraph to insert it, place it at the end of a paragraph.
- Align all figures, examples, and tables with the left margin
- Neatly organize tables. Do not combine multiple tables into one long table; keep them simple and clean.
- Do not include “raw data” in tables such as unedited interview transcripts or computer output.
- Double-space short tables, and begin and end on the same page.
- Start long tables at the top of the page, single-space table content, and continue to the following page(s) if necessary. If the table runs onto more than
one page, include “Table #, continued” at the top of each subsequent page. Repeat column headings on each subsequent page.

- Make titles of tables, examples, and figures concise. Include all in a list of tables, list of examples, or list of figures worded exactly as they appear in the body of the dissertation. If explanatory information is added to the title, do not place this material in the List of Tables, List of Examples, or List of Figures. (each list starts on a new page in the preliminary section, after the Table of Contents.)

- Table titles go above the tables. Choose one of the following numbering styles, and use throughout your document:
  - numbered consecutively in Arabic numerals throughout the manuscript.
  - chapter or appendix prefix in the table number, with table numbering starting again with table 1 in each chapter or appendix, such as:
    - tables in Chapter II would be Table 2.1, 2.2, 2.3, etc
    - tables in Appendix C would be Table C.1, C.2, C.3
  - Include appendix table titles in the List of Tables following the tables listed in the main text of the dissertation.
  - Do not include chapter numbering if tables only appear in one chapter.

- Place figure titles outside and below the figure. Use the same numbering system for figures as for tables, using either consecutive numbering throughout the dissertation or using the chapter or appendix prefix numbering format.

- Place example titles outside and below the example. Designate musical examples as “example” and abbreviated “Ex.” in the caption. Use the same numbering system for examples that they use for tables and figures.

- If using a landscape orientation, allow for the 1.5 inch margin at the "top" of the table and the title oriented to read above the table.

**Chapter or Section Heading Format**

Style, format and position of headings should follow rules in the publication style manual you are using, e.g., APA, Chicago style, etc.; however, the following rules also apply:

- Chapter or section title is not counted as a “level” in determining the heading format. The "First-Level Heading" starts after the title. Start over with "First-Level" in every new chapter or section.

- Centered titles and headings longer than 4 inches, divide into multiple, single-spaced, first lines longer than the next in all cases.
• Side headings longer than 2.5 inches, divide into multiple lines and single-spaced, first lines longer than the next in all cases.

• Apply to all centered and flush left titles and headings. Do not apply to paragraph headings (such as 3rd, 4th or 5th levels in APA format.)

• Do not use acronyms or abbreviations in title or headings. Spell them out.

• If two (or more) headings appear together (without a paragraph between), leave 1 blank lines between the headings, and a double-space (one blank line) between the heading and the text that follows. Be consistent on all headers.

Page Numbering

• Set page numbers ½ inch from the edge of the page (inside a page header or footer, within the margin) so the number does not overlap into the text of the dissertation.

• Place page numbers on landscape pages in the same position as the portrait pages of a paper document so that a reader looks for the table or figure, it is in the top right corner. This may require you to set the numbers manually in a text box so the number can be turned to the same reading direction as the other page numbers.

• The top of any landscape page must have the 1.5 inch margin.

Preliminary pages - Roman numerals.

• Do NOT insert numbers on the copyright, title and signature pages.

• Number the preliminary pages with lower-case Roman numerals, bottom center of the page.

• Start showing page numbers on the Abstract, beginning with the number iii and continue until the first page of the dissertation or scholarly project.

Body of dissertation or scholarly project - Arabic numerals.

• Arabic numbers begin with the first page of the Preface or the first page of Chapter I, and continue throughout the study, references, and appendices in the upper right hand corner of the page.

• You choose whether to show a number on the first page of each chapter.
Research Questions and Research Hypotheses

Block indent and single-space each question with double-spacing between questions. If you are using guiding questions, aims or assumptions, follow these same formatting guidelines using A1, A2, etc. for Aims or Assumptions, and Q1, Q2, and so on for all types of questions. For example:

Q1 To what extent does nurse work environment and level of burnout explain patients’ satisfaction with care?

Q2 How do teachers interpret social interactions among children with hearing impairments?

Many investigations include formal statements of research hypotheses. Use the same format as used above for research questions. Number research hypotheses H1, H2, etc. and indent as a blocked quotation. For example:

H1 Group study will result in higher achievement scores than individual study among graduate students enrolled in introductory level statistics courses.

H2 Practice of a mental function will produce more rapid future learning of that mental function.

H3 Attitudes toward occupational roles are related to behaviors and expectations associated with those roles.

Occasionally, a student might state statistical hypotheses, including null hypotheses, in addition to research hypotheses; if so, type them as H01, H02, and so on.

Format Requirements of the Dissertation or Scholarly Project

This section identifies and details the order of the final dissertation or scholarly project regardless of which structure you choose. Examples of specific pages are in the Appendix. All pages must follow the 1.5 inch left margin requirement. Top, right and bottom margin settings are 1”.

Preliminary Pages

Copyright page. Copyright subsists in accordance with this title, “original works of authorship fixed in any tangible medium of expression, now known or later developed, from which they can be perceived, reproduced, or otherwise communicated, either directly or with the aid of a machine or device” (U.S. Copyright Act of 2009, http://www.copyright.gov/title17/92chap1.pdf). This means that the Copyright Act protects a dissertation or scholarly project as soon as the author creates it. Registration of copyright is not required to protect the work against unrestricted distribution of the
manuscripts or significant portions thereof; however, it may be beneficial if going to court over plagiarism issues.

Many students register their dissertation or scholarly project formally for copyright in order to establish proof of date and source of authorship. Students either register it themselves on the webpage for the U.S. Copyright Office, http://www.copyright.gov, or request that ProQuest Information and Learning (PQIL) process the copyright (this requires publishing through ProQuest). Students working with PQIL must have a copyright page and make the payment directly to PQIL when uploading the digital document (i.e., dissertation or scholarly project) to ProQuest. The copyright page should include the student’s name in full since the copyright is a legally binding document. See the copyright format under Sample Pages and Format Templates on the Graduate School’s website.

The copyright page is not numbered and is placed before the title page. It is not required, but is highly recommended. You do not need to register the copyright with the Library of Congress in order to include a copyright page.

**Title page.** Example of UNC format in the Appendix.

- Follow University of Northern Colorado layout.
- Include the full dissertation or Scholarly project title in all capital letters, centered between the margins.
- Format titles in all capital letters. If the title is longer than 4 inches, use an inverted pyramid format with the first line no longer than 4 inches and each subsequent line shorter than the previous line. Single-space the title if it requires two or more lines.
- Spell out abbreviations or acronyms in the title.
- If a title begins with an Arabic numeral, spell out the number, e.g., 21st Century would be written as Twenty-First Century; the only exception is for chemical compounds, e.g., 8-METHYL-6-THIOPURINE, for which numerals are permitted to begin a title.
- Center your full name as it appears in URSA and DegreeWorks. Make name changes through the Registrar's Office.
- The title and student’s full name must match the name and title on the copyright page, abstract, and signature pages.
- Date should be the month and year that the final degree is awarded (graduation month and year.)
- This page is not numbered.
Signature page. Example of UNC format in the Appendix.

- Follow University of Northern Colorado layout of this page.

- Every copy turned in must have original signatures in blue or black ink. Print at least 2 original pages to turn into the Graduate School.

- The title and author’s (student’s) full name must match the title and name on the title page, copyright page, and abstract.

- Type professors' names, committee role, and academic credentials (e.g., D.A., D.M.A., D.M.E., Ed.D., Ph.D., or other specific degree) below their signature line. Doctoral committee members’ names and committee roles (e.g., Research Advisor, Faculty Representative, etc.) must match the names and roles listed on the doctoral committee approval letter.

- Do not use acronyms or abbreviations in the title.

- This page is not numbered.

Abstract (Executive Summary for DNP Scholarly Projects). Example of UNC format in the Appendix.

- Author Citation at the top of the abstract page is single spaced with a hanging indent on second and subsequent lines, follow the University of Northern Colorado format.

  - Doctoral dissertations – list as a "Published Doctoral Dissertation" as you are required by the Graduate School to disseminate your dissertation (publish) with ProQuest Information and Learning (PQIL).

  - Doctoral scholarly projects, record the document as either an “Unpublished Doctor of Audiology Scholarly Project” or “Unpublished Doctor of Nursing Practice Scholarly Project”, as applicable, unless you will disseminate your document through PQIL. If you do publish, list this as "Published Doctor of …" in the author citation.

- Author name and title on the abstract author citation should match those on the title and signature pages.

- The abstract is a brief description of the research topic, significance, methods, results, implications, and conclusions in a concise manner. There is no page or word limit for the abstract. Double-space the abstract.

- Number the first page of the abstract with page iii using lowercase Roman numeral at the bottom center of the page, in the footer (within the margin.)
Acknowledgments or dedication (optional).

- This a record of the author's indebtedness to faculty members, family members, student colleagues, typists, friends, funding agencies, and others who contributed to the study’s completion.

- If you are including journal manuscripts in your dissertation, you may want to go into more detail about the contributions co-authors (if any) made to your research and article.

- Write acknowledgments in a dignified manner and follow the same formatting requirements as the body of the dissertation or scholarly project.

- This section may also include reference to permission granted to use previously copyrighted materials appearing extensively in the dissertation.

- Number the acknowledgements (or dedication) pages sequentially after the Abstract pages and place the lower case Roman numerals in the bottom center of the page in the footer (within the margin.)

Table of contents, list of tables, list of figures, and/or list of examples.
Example of UNC format in the Appendix.

- The first entry in the Table of Contents is either the first page of the PREFACE (if applicable) or CHAPTER I.

- Include every chapter, title, and its respective page number along with at least one level of heading in the Table of Contents.

- Use Roman numerals for the chapter numbers in the Chapter and the Table of Contents.

- Page numbers should be flush at the right margin, while keeping the chapters and headings cleanly aligned at the left.

- Use exactly the same wording in the Table of Contents as the chapter titles and headings that appear in the body of the manuscript.

- If tables and/or figures appear in the body of the dissertation or scholarly project, include separate lists for the List of Tables, List of Figures and/or List of Examples following the same formatting rules as for the Table of Contents. Start each separate list on a new page.

- Number pages of the Table of Contents with lowercase Roman numerals continuing from the previous page, bottom center of the page in the footer (within the margin.)
Body of the Dissertation or Scholarly Project

The body of the dissertation or scholarly project consists of the study itself. It should conform with the selected style manual appropriate to the discipline and this *Doctoral Dissertation and Scholarly Project Format Manual*. If there is a difference in style between the program's adopted style manual and Graduate School format, the Graduate School format overrides the program style manual. If you have questions, contact the Thesis and Dissertation Specialist in the Graduate School.

**Preface (optional).** Normally, there is no reason to include a preface in the dissertation or Scholarly Project because an introduction is contained within the first chapter. Only in cases where the genesis of the undertaking is important for an understanding of the work, or where the method of research or other aspect of the investigation is out of the ordinary, would you include a preface.

**Main text of dissertation or scholarly project.** Example of UNC format for first page of new chapter or section in the Appendix.

- The main text of the dissertation or scholarly project starts with page 1 of Chapter I.

- Start numbering on page 1 of the dissertation or scholarly project with Arabic numerals, top right of the page, in the header (within the margin.)

- Follow heading style and format adopted by your program (e.g., APA, Chicago, Turabian, American Chemical Society, or American Sociological Society, etc.)

- Indicate IRB (Institutional Review Board) and/or IACUC (Institutional Animal Care and Use Committee) approval in the methods section if your research involves either human participants or animal subjects.

- Use consistent spacing after end of the sentence punctuation, e.g., using one or two spaces consistently following a period or question mark.

**Reference citations, reference list, or bibliography.**

- Write reference citations and the reference list or bibliography in accordance with the selected style manual for the discipline or type of research conducted.

- Check author citations and reference listings for name order, spelling, and year match.
- Every reference cited must be in the reference list.
• Every author or group in the reference list must be cited in your dissertation or scholarly project. If not, remove from the reference list.

• Do not allow a reference listing to divide in the middle; keep full listing on the same page.

**Appendices.** Example of UNC format of Appendix Title page in the Appendix.

• Include a separate title page for each appendix.

• List the appendix title and page number in the Table of Contents.

• Make format consistent with the rest of the dissertation or scholarly project, including margins, page numbering, and clarity of scanned images.

• Make reductions clear and readable.

• Include the IRB or IACUC approval in an appendix, if applicable.

**Final Checklist**

Whether or not you employ a typist, it is your responsibility to proofread the dissertation or scholarly project before turning it into the Graduate School for review. Turn in the review copy electronically by the “Last day for filing Master’s Thesis and Doctoral Dissertation” on the schedule of deadlines. The entire document must satisfy the professional standards maintained by the Graduate School of the University of Northern Colorado.

____ Do all pages, including preliminary pages and appendixes, have a 1.5 inch left margin?

____ Is your name identical as shown in DegreeWorks on the title page, signature page, and abstract citation? If a copyright page is included, does the name match on all pages?

____ Does the title match exactly on title page, signature page, and abstract?

____ Is the date at the bottom of the title page the month and year that your degree will be awarded?

____ Are all committee members and their committee roles (e.g., Research Advisor, Committee Member, Faculty Representative) listed on the signature page? For doctoral students, do these roles match those listed on the approved Request for Appointment of Doctoral Committee form?
______ Have all committee members signed each page, and are signatures originals; *not* copies or digital signatures?

______ Does the Table of Contents reflect the exact titles, headings, and subheadings as they appear in the text? Does it reflect correct page numbers? Every time you make changes, recheck the page numbers.

______ Do List of Tables and List of Figures entries reflect identical titles and page numbers as found in the text?

______ Have you changed the proposal wording from future to past tense in the final version of *all* chapters? Have you removed the word "proposal" from the title page?

______ Have you numbered the preliminary pages with lower case Roman numerals, and changed the numbering to Arabic numerals on page 1 of the study?

______ If applicable, did you explain the informed consent process for a study involving human participants (subjects) and indicate receipt of IRB or IACUC approval in your methods section. Did you include a copy of the IRB or IACUC Approval in your Appendix, if using either human participants or animal subjects?

______ Does every chapter start on a new page 2 inches from the top of the paper?

______ Have you eliminated “widows and orphans” from the document?

______ Have you double-checked the spelling, author order, and year of every citation and reference listing? If a source is cited in the chapters, remove the listing from the references.

______ If applicable, have you obtained appropriate copyright permissions for figures or previously published documents? If you are using the journal manuscript format, copyright permission would be needed if you include a published journal article as one of your dissertation or scholarly project chapters.

______ Have you checked the page numbering and order of pages on the original and all copies of the dissertation or scholarly project before submitting the final version to the Graduate School?
Submitting the Final Dissertation or Scholarly Project

Defending the Dissertation or Scholarly Project

- Schedule your dissertation or Scholarly project defense with your committee and program office according to their program’s requirements.

- Schedule your Dissertation or Scholarly Project Defense with the Graduate School at least two weeks prior to the date you wish to defend by sending the completed Request to Schedule a Doctoral Examination form to the Graduate School.

- After the defense, assuming it has been successful, have committee members sign two (2) of the original signature pages for the Graduate School. These must be original signatures in blue or black ink on either cotton or plain paper.

- If the committee requests changes to the dissertation or scholarly project, the research advisor may wait to sign the signature pages until changes are accepted. The Graduate School will review a dissertation or scholarly project after the committee has approved the dissertation or scholarly project and signed the signature pages.

- Turn in your dissertation or scholarly project to the Thesis and Dissertation Specialist by email at least four weeks (28 calendar days) before the anticipated graduation date. Failure to do so may move you to the graduation list for the following semester. (Check dates on the Graduation Deadlines on the Graduate School website.)

Submission of Review Copy

After your committee approves your dissertation or scholarly project, email the following to the Thesis and Dissertation Specialist:

- Electronic Copy of Dissertation or Scholarly Project in one document, either in MS Word or PDF.
- Review Submission Form - indicate the editorial style manual used (e.g., APA, Chicago, etc.) and the name of your typist, if applicable.
- Verification of Research Subject or Participant Compliance form, signed by you and your research advisor
- IRB Approval
- Scan of Signed Signature page (deliver Two (2) original Signed Signature pages delivered to the Graduate School by mail or in person.)

The Graduate School must receive the signed copy of the Results of the Dissertation Defense form for dissertations or Results of the Scholarly Project Defense form for DNP or AUD Scholarly Projects before we can award your degree.
Two people from the Graduate School read the review copy for format and to assure that it meets University standards. Corrections are common at this point, so students must wait for final approval before uploading Archival copies to ProQuest or Digital UNC. The Graduate School will keep the review copy and email revision notes to the student.

Fees

The Graduate School charges students’ UNC student account (URSA) an $85 Processing fee after all forms and Archival upload requirements are completed. Students make payment through URSA.

Required Final Forms

Please Note: Open and complete the fillable forms on the Graduate School website, using Internet Explorer 11 as your browser. Forms are not successfully opening using Microsoft Edge, Chrome or Firefox.

If you are using a Macintosh to fill out Graduate School forms, you must use Adobe Reader or Adobe Professional. Do not fill out the form in Preview mode.

- Binding Sheet - include a permanent mailing address, phone number, and personal email that will not change after graduation.

- Survey of Earned Doctorates (https://sed.norc.org/showRegister.do). This is not required for DNP or AUD students.

- Doctoral Dissertation Publishing. Upload your dissertation via ProQuest Information and Learning (PQIL), https://secure.etdadmin.com/cgi-bin/home which is an online document repository. Read the information on publishing embargos on the ProQuest website if you plan to publish any portion of your dissertation in a journal or book. You may also pay for ProQuest to register your copyright for you.

- Doctor of Audiology or Doctor of Nursing Practice students are required to deposit the electronic copy of the final scholarly project with Digital UNC electronic repository for UNC archives. The Thesis and Dissertation Specialist in the Graduate School will provide instructions after the scholarly project approval.

Format for Abstract Page

Top margin must be two inches

Left margin is 1.5 inches

blue text on your final pages

ABSTRACT

Last name, First Name. *Title of dissertation is in italics*. Published Doctor of *(*Arts, Education, Philosophy, Psychology, Audiology, Nursing Practice) dissertation (Unpublished / Scholarly project), University of Northern Colorado, Year.

Leave two blank lines between citation and abstract text

The name used on the title page and the abstract must be your legal name (as it is recorded in URSA) so it will match the name on your transcript. The title on the abstract must match the title on the title page exactly. The year must be year when the degree is awarded. The abstract is a summary of the manuscript and includes the purpose of the project, pertinent findings, and significance of the paper. As a brief overview (usually 1 to 2 pages; however, there is no page limit), an abstract gives the reader concise information that conveys the importance of the manuscript.

“ABSTRACT” is centered (two inches from the top of the page, one inch down from the margin) above the author citation, and the body of the abstract is double-spaced.

The Abstract is the first page showing a page number. In the footer, insert page number with a lower case Roman numeral

iii
Format For Table Of Contents, List of Tables & List of Figures
You may create manually by creating a table, then remove the lines or you may use the Table of Contents feature in MS Word. (DO NOT include the above heading or blue text on your final pages)

Left margin is 1.5 inches  Top margin must be two inches

APPENDIX
   A. Institutional Review Board Approval............................. #
   B. Title of Appendix B.................................................. #

The organization and titles of chapters may be different based upon the basis of your study. This is just a sample of the alignment. It is not required that you put pages for each level of heading, but if you do, be consistent. If you do not have level two, three, or four headings in all chapters, do not list second, third, or fourth level headings for any chapters.
CHAPTER I

TITLE OF CHAPTER IN INVERTED FORMAT
AND SINGLE-SPACED IF TITLE IS
LONGER THAN FOUR INCHES

Level One Heading in Inverted Format and Single-Spaced if Title is Longer Than Four Inches

This is an example based upon the use of the Publication Manual of the American Psychological Association (6th Edition). If the editorial style manual you are using for your dissertation does not specifically require bold font for headings, do not use bold font at all. Put the text of the chapter on the same page, double-spaced. Be sure to follow your program’s or department’s editorial guidelines for actual format for the heading style.

Level Two Heading in Inverted Format and Single-Spaced if Longer than Two and a Half Inches

If a side heading is longer than two-and a half inches, format it in multiple single-spaced lines, in inverted pyramid format. Make sure to remove "extra" space above and below headings. This is a setting in the Paragraph Settings.
APPENDIX B

JOURNAL MANUSCRIPT EXAMPLE PAGES
CHAPTER IV

TITLE OF THE CHAPTER/MANUSCRIPT IN ALL CAPS
INVERTED PYRAMID STYLE AND
SINGLE SPACED

This chapter has been previously published or accepted for publication in *Fictitious Journal*.

**Contribution of Authors and Co-Authors**

Manuscript(s) in Chapter(s) II, III, IV, etc…

Author: Type author name here (First author must be the student)

Contributions: List contributions here, single spaced

Co-Author: Type co-author name here

Contributions: List contributions here, single spaced

Co-Author: Type co-author name here

Contributions: List Contributions Here, Single Spaced

**Make sure you include all authors and co-authors on this page, individually, and a brief paragraph of what each has contributed.**
CHAPTER IV

COMPARISON OF MODEL FIT INDICES IN CONFIRMATORY FACTOR ANALYSIS MODELS ACROSS FIVE SOFTWARE PACKAGES

This chapter has been previously published or accepted for publication in *Fictitious Journal*.

**Contribution of Authors and Co-Authors**

Manuscript in Chapter IV

*Author: Mary S. Smith*

Contributions: Conceived the study topic, developed and implemented the study design. Generated and analyzed data. Wrote first draft of the manuscript.

*Co-Author: Dr. Jacob B. Goodwin*

Contributions: Helped conceive the study design. Provided feedback on statistical analyses and early drafts of the manuscript.

*Co-Author: Dr. Keith L. Little*

Contributions: Helped conceive and implement the study design. Provided field expertise and funding. Provided feedback on early drafts of the manuscript.

*Co-Author: Dr. Janice J. Johnson*

Contributions: Provided feedback on the study design. Provided statistical advice and comments on the manuscript.
