All researchers planning to examine data from human participants or animal subjects for which IRB or IACUC approval is necessary, according to the procedures of these entities, are required by the University of Northern Colorado to obtain approval prior to the initiation of any data collection.

This form must be turned in to the Graduate School at the same time the documents for the Dissertation Proposal, Final Dissertation, Final Master's Thesis, or Final Capstone are being submitted. It is understood that circumstances may arise in which the researcher may need to alter some aspect of the research plan necessitating filing of a Change in Protocol to IRB or IACUC. Failure to maintain the necessary records of research review and approval is a violation of Federal Law and could result in suspension of federal research funds to the University of Northern Colorado. Non-compliance with filing this form will significantly delay graduation for the student by disallowing the inclusion of any dissertation, thesis, or capstone data collected while out of compliance. In addition, non-compliance could result in scientific misconduct for the student's advisor (see section on IRB Non-Compliance and Reported Irregularities during Research in the Procedures for Research Involving Human Participants).
