Education

PhD, Indiana University, 1984.
Area of Study: Reading Education, Linguistics and Bilingual Education

MA, Indiana University, 1974.
Area of Study: Spanish Literature

BA, Purdue University, 1972.
Area of Study: Spanish Education

Professional Academic Experience

Professor, University of Northern Colorado. (2001 - Present).

Interim Chair, Hispanic Studies, University of Northern Colorado. (2015 - 2017).

Director, School of Modern Languages and Cultural Studies, University of Northern Colorado.
(2005 - 2009).

Director, Center for Language Arts Education and Professor of Hispanic Studies, University of
Northern Colorado. (2001 - 2005).

Professor, University of Nebraska - Lincoln. (1995 - 2001).

Associate Professor, University of North Dakota. (1991 - 1995).

Administrative Roles

School Director, (2005 - 2008).

Center Director, (2001 - 2005).

Licensures and Certifications

Bilingual Education, State of Indiana. (August 1984 - Present).

Reading Education, State of Indiana. (August 1984 - Present).

Spanish 7-12, State of Indiana. (August 1972 - Present).

Research in Progress

"Culturally and Linguistically Diverse Pedagogical Content Knowledge in Mathematics and Science" (Writing Results).

This is a three-year study of the changes dual endorsed (ESL and elementary) pre-service teachers and their teacher mentors made in their cultural and linguistic pedagogical content knowledge (CLD-PCK) instructional practices, beliefs and self-efficacy for teaching mathematics and science to English learners (ELs), mathematics and science content knowledge, academic language and cultural knowledge needed to teach mathematics and science to ELs, and perceptions of the school university partnership. Classroom observations, surveys, and mathematics and science content tests were used to document changes over three years for both pre-service and mentor teachers. There were significant changes in the development of the pre-service teachers for both mathematics and science lessons and for both primary and intermediate grades. Trajectories of development for both pre-service and mentor teachers' development are compared. Recommendations include focusing on more integration in university coursework across departments and continued professional development for mentor teachers.

Submitted to the Journal of Teacher Education

"Emergent Bilingual Children Writing Poetry: A Model Poem Approach" (Writing Results).

When taught poetry writing using model poems, six fifth grade emergent bilingual students wrote fluently and with originality and voice. The children participated in a poetry workshop

in their elementary classroom, writing poems based on poems written by Kenneth Patchen, Francisco Alarcón, and N. Scott Momaday. Word counts and descriptions of images in poems written by the six children demonstrated that this type of poetry writing instruction is effective in teaching written language to English learners. When model poems have multicultural perspectives, emergent bilingual children are given examples of how to express cultural perspectives and their sense of place within the worlds in which they live.

"Learning to Be Culturally and Linguistically Responsive Teachers" (On-Going).

This sabbatical research is case study research of eight pre-service teachers learning to be culturally and linguistically responsive teachers in mathematics and science. Analysis of five teaching videos for each pre-service teacher over a three-year period of time will indicate trajectories for development. Three of the eight teachers are Latinas, three are bilingually endorsed, and all eight are CLD-endorsed teachers in the elementary education program.
