Migration Tips

What does not come over in the migration from Bb to Canvas?

Content	Action
Student Information	Download any previous gradebooks and any student work you might need.
Blogs, Journal, Wikis	Copy and paste content into Content Pages, and rebuild using discussions and/or groups
YouTube mash-ups	Copy and paste YouTube URL's and open using YouTube tool on Content Pages.
Embedded Audio	Locate MP3 file in Files, and re-link on content page
Hot spot, either/or, and quiz bowl questions	These question types don't exist in Canvas. You will want to copy and paste these questions into your files so you have them, and then redesign for Canvas
Matching question	This question type is different. Double check your matching questions to be sure everything came over.
Quiz point values	Double check all question point values for accuracy
Links to Quiz Pools	Check all quizzes that are derived from Pools and re-establish the link to Canvas' Question Banks.
Glossary	Canvas does not have this tool. If you have a Glossary, create a glossary module and move all glossary item pages into the module. Copy and paste each item onto one page. Work with IDD if you have a large glossary.
Rubrics	Double check all rubrics to be sure everything came over.
Groups	Anything associated with student data will not come over. If you have instructions or content in Bb groups, copy that information so you have it when you construct your groups in Canvas
Calculated columns in Grade Book	The Grade Book in Canvas is different. To ease the transition, scan through Canvas' grade book guides: http://guides.instructure.com/m/4152/l/54996-what-are-grades-and-the-gradebook
