**Wednesday October 17th 6:30 - 8:00 pm**

Join us for a night of **games, puzzles, magic, and fun** for the whole family!

## Special Guest Lecture!

**Dr. Jennifer Quinn** (University of Washington Tacoma)

**Ross 1040 5:00 - 6:00 pm**

Which technique is mathematically superior: counting or matching?

The audience will judge a tongue-in-cheek competition between the Countess (representing counting) and Sir Match-a-Lot (representing matching). Contestants prepare identities to showcase a required component and their respective techniques.

How are the terms in each identity concretely interpreted?

What is being counted? What is being matched?

Which is superior? You decide.
