

SEMINAR IN PHYSICS

Life After Ross Hall

Kay & Larry Britton

Project Engineer Staff

Lockheed Martin Information Systems & Global Solutions (IS&GS)

- **University of Northern Colorado alumni Larry Britton (B.A. Physics, 1994) and Kay Britton (B.A. Physics, 1995) return to discuss their careers as Department of Defense contractors after graduation.**
- **The briefing will cover the general systems engineering life-cycle of a department of defense contract. A general overview of each program in which they have worked, and where each program was in the systems engineering lifecycle, will be provided.**
- **This will be followed by a more detailed discussion on the positions that were held on each contract and how their Physics degrees were utilized. In all positions that they have held, system requirements have been an integral thread in how their jobs were defined. Therefore a quick group exercise will be conducted to experience the generation and decomposition of system requirements as they would be refined through the systems engineering lifecycle.**

Friday, March 1

3:30 - 4:45

Ross 0220

(...Refreshments, of course☺)
