

# SEMINAR IN PHYSICS

FRIDAY, MARCH 7, 2014

3:30-4:25 – ROSS 0220

REFRESHMENTS

## **Careers in Physics: Aerospace and Radiation Effects**

**Aaron Adamson, SEAKR Engineering**

Aerospace is a cutting-edge industry with a high demand for physics and engineering expertise. Specifically, the field of radiation effects engineering involves aspects of nuclear and particle physics, semiconductor device physics, electrical engineering, and astrophysics. This talk will offer a specific look at radiation effects and similar career opportunities at SEAKR engineering, a growing aerospace engineering firm based in Centennial, CO.
