

# Science Teaching Graduates!

Friday, March 27<sup>th</sup>

3:30pm

**4:30 – 6:00 Reception**

Zachary Armstrong

*Learning to Learn through High School Science Research Projects*

LOCATION: Ross 0060

In addition to sharing the wonder and awe of science, I get to be part of so many students' lives and help them find the next steps towards their dreams. It's cool to me that I get to be that crazy teacher students tell stories about for the rest of their lives.

*Department of Physics and Astronomy Seminar*

Nickolas True

*Using Momentum from College to Leverage Success in your Career*

LOCATION: Ross 0090

I have had many roles in education over the past seven years, from science teacher to Assistant Principal. The most rewarding aspects of my career have always revolved around experiences of student success in its many forms. Those 'ah-ha moments' when students experience a burst of confidence from making high-level connections motivate me every day.

*School of Biological Sciences Seminar*

**NHS 10 UNDER 10**  
*Special Presentations*  
Friday, March 27, 2015

UNIVERSITY of  
NORTHERN COLORADO

Bringing  
education  
to life.
