

SEMINAR IN PHYSICS

Friday, April 14, 2017
3:30-4:25 - Ross 0220

Quantum Dots, DNA Origami and Soft Matter

Dr. Ruwang Sung

UNC Department of Physics and Astronomy

Basic concepts, current research, and applications will be presented for quantum dots, DNA origami and soft matter. How to incorporate these new integrated and interdisciplinary research areas into undergraduate physics education and research will also be discussed.
