This four-year plan is a recommended schedule to complete your bachelor's degree in 4 years. Every UNC student must meet the following requirements in order to graduate with a bachelor's degree: earn a minimum of 120 semester credit hours; possess a minimum of a 2.00 cumulative grade point average; have at least 40 credit hours in courses designated as Liberal Arts Core; meet all degree requirements in the student's major field of study. Each major and/or emphasis may have additional requirements necessary for graduation. Students must consult with their major advisor to receive information on any additional graduation requirements.

Admission Requirement – No separate admission requirement.

Minor Required - No Minor required.

Contact Information – Department of Physics and Astronomy Ross Hall Room 0232, 970-351-2961

Notes

¹Students who need further preparation in mathematics may need to start in MATH 124 (4) -- College Algebra or MATH 127 (4) -- Elementary Functions. Please consult your major advisor.

²To satisfy the Liberal Arts Core requirements using this plan, students need to select courses from Area 7 and/or 8 that also count for Areas 3, 4, or 5.

³Because some of the major courses are offered every other year, two plans are provided -- one for the student's 3rd year commencing in an even year and one for it commencing in an odd year. If a student starts the physics major in 2020-2021 and stays on track, their 3rd year would begin in 2022, an even year.

⁴Students must select a senior research topic and have it approved by their major advisor in order to register for their final year of classes.

⁵HON 451 may be substituted for PHYS 470.

A minimum 2.0 cumulative grade point average is required in PHYS prefix courses for graduation.
