

# 5 Tips

to Prevent Zoom Bombing

**1** Use Your UNCO Account to Access Zoom.

**2**

Use a Unique ID for Public Sessions.

Your Personal Meeting ID (PMI) is your Zoom phone number.

**3** Check How Participants Enter Meetings.

 Meetings can be password protected for extra security.

 Use the waiting room to help screen participants.

 Enable the "mute participants on entrance" function.

Using a unique public ID masks your PMI. Similar to blocking Caller ID on a phone.

**5** Designate a Co-host to Moderate.

Co-hosts can help moderate issues:

- Remove participants from the meeting.
- Mute participants.
- Turn-off participants' cameras.

**4**

Consider Your Screen Share Options.

Do participants need to share their screens? If not, disable participants from sharing.

Designated co-hosts do not need a Zoom Pro account.
