Returning to Ethics: A Meta-ethical Analysis of Community Interpreters' Codes and Standards of Practice

Robyn K. Dean, CI/CT, PhD

Assistant Professor, National Technical Institute f/t Deaf

Before we get started

Webinar host: Amy Williamson

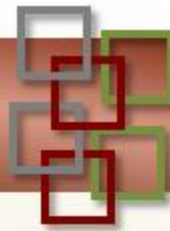

The Chat Box is your friend:

- If you have an **issue or tech problem**, *type in the box*. A MARIE Center staff person will help you out.
- If you have a **question or comment**, *type it in the box*. Questions will be shared with the presenters at the end of the webinar.

The screenshot shows the GoToMeeting interface. At the top, there is a menu bar with 'File', 'Options', 'View', and 'Help'. Below the menu bar, the 'Screen Sharing' section is visible, with a status of 'Stopped' and the message 'No one sees your screen'. There are four buttons: 'Show My Screen' (with a play icon), 'Stop Showing Screen' (with a square icon), 'Give Keyboard & Mouse' (with a mouse cursor icon), and 'Change Presenter' (with a person icon). Below these buttons, there is a 'Start Recording' button and a status indicator '13.5 GB remaining'. The 'Webcam' and 'Audio' sections are also visible, both with expandable icons. The 'Attendees' section shows '1 out of 26'. The 'Chat' section is expanded, showing a text input field with the placeholder '[Type message here]' and a 'Send' button. At the bottom, there is a 'Meet Now' section with the meeting ID '267-736-285' and the GoToMeeting logo.

Evaluations & CEUs

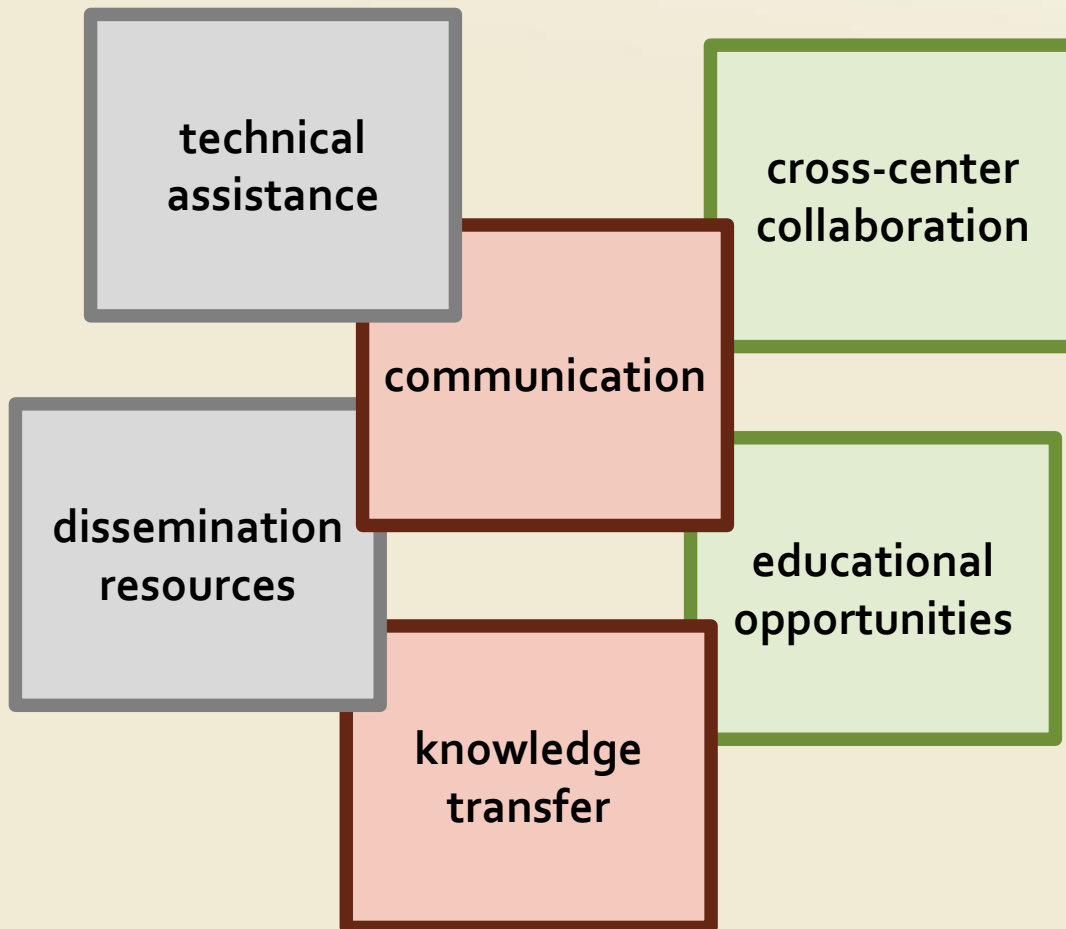

- Email with link to evaluation and CEU request will be sent this evening
- We have a list of the logged in attendees and will match it up with those of you filing out the evaluation & CEU request
- May take up to 4 weeks for CEUs to be posted
- **IF YOU ARE WITH A GROUP: EVERYONE SIGN THE SIGN IN SHEET** & return it to Carrie Woodruff

Adapting Health Education Material for Deaf Audiences

Robert Q Pollard Jr., Robyn K. Dean, Amanda O’Hearn, and Sharon L. Haynes
University of Rochester Medical Center

Problem: The deaf population is an often-overlooked limited English proficiency (LEP) group at risk for health disparities associated with low health literacy. Lack of access to health information conveyed via radio, television, or ambient auditory sources such as public conversation further aggravates this population’s low health literacy. Methods of adapting health education material for hearing LEP populations do not reach deaf audiences with equal effectiveness. **Method:** We adapt health education material for deaf audiences by first determining the “learning points” contained in vetted source material. A dialog-based film script covering those learning points is created. Supplemental content addressing common deaf population knowledge gaps and sociocultural experiences is added. Deaf actors are filmed following the adapted American Sign Language (ASL) script. Their ASL is back-translated into English to yield vocal track and subtitle scripts. The source material author(s) are consulted throughout the process to assure the film’s adherence to the learning point list. **Results:** Users report that the adapted product is more relevant, engaging, and effective for deaf audiences. **Conclusion:** This adaptation approach may aid in reducing deaf population health disparities.

Keywords: deaf, health literacy, health disparities, American Sign Language, health education

Adaptation-Related Publications

- Pollard, R. Q., Dean, R. K., O' Hearn, A. M. & Haynes, S. L. (2009). Adapting health education material for deaf audiences. *Rehabilitation Psychology, 54*(2), 232-238.

Adaptation or Translation

- RID
- CIT
- Street Leverage

Proposal: Levels of Accessibility

- A presentation conceived of in English (following English argumentation) and 'signed' but basically transliteration
 - EnglASL™ (like Spanglish)
- A presentation conceived of in English and interpreted through a competent interpreter (i.e., a deaf interpreter) who has full knowledge and understanding of the subject (strategically competent)
- A presentation conceived of in English and presented in Academic ASL
- A presentation conceived (adapted into) of in ASL and signed (perhaps even a combination of ASL and English).

How is this related?

Research shows:

How we talk about things...

How we think about things...

How we feel about things...

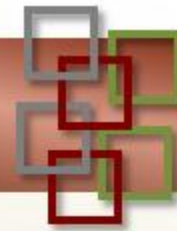

How we behave.

How we behave = effectiveness & ethics

What is the profession trying to say?

What is more interesting is...

Insert
Metaphor
Here

Why do we even USE metaphors?

Meta-ethics:

How people conceive of ethical behavior and how they talk about it
or *the lens they choose*

Fields of study that contribute to ethics

**Ethicists
(Applied)**

Normative ethics

Sociologists

Descriptive ethics

Philosophers

Meta- ethics

Types of ethics

- Normative ethics

- *What one ought to do...*

- Descriptive ethics

- *What one actually does...*

- Meta-ethics

- *Constructs and terms used to conceive and articulate...*

Meta-ethics: Who cares?

How we talk about things...

How we think about things...

How we feel about things...

How we behave

You have heard / You have said...

I stepped out of
role...

Get back in role

That's not my
role...

That's the role
of the teacher /
nurse / lawyer...

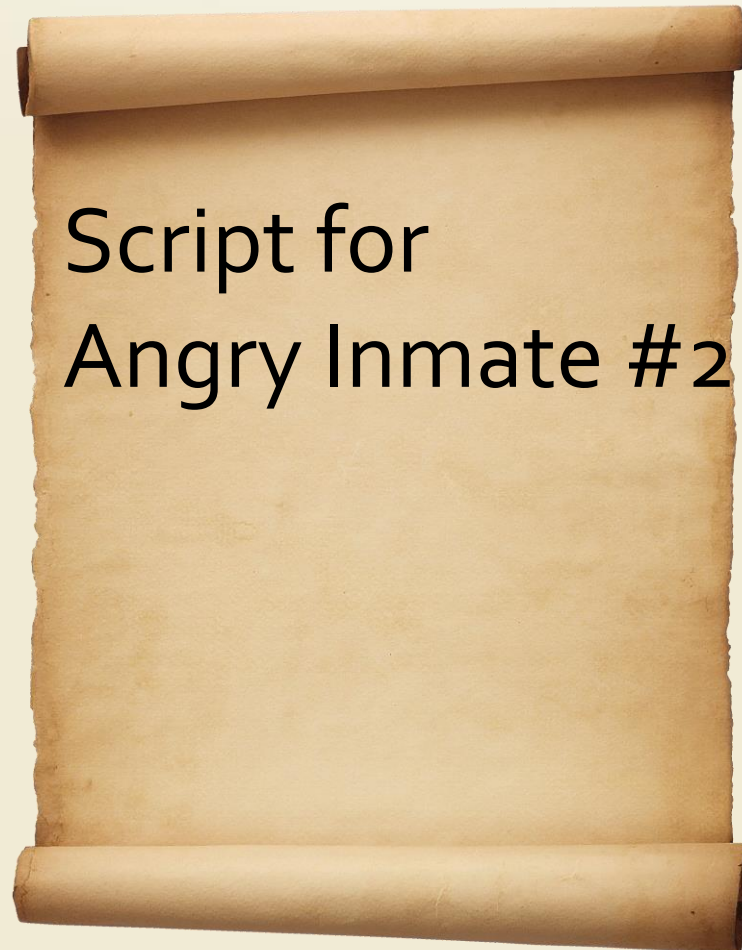

Why don't you hear this?

It is my role to

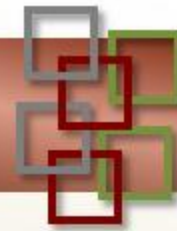

(some action)

Where we get role & why it matters

ROLL became ROLE

Play out in the subconscious:

How we talk about things...

"ROLE"

A script to follow

How we think about things...

How we feel about things...

Wrong to deviate

I won't deviate ...

How we behave.

But other professionals use role, right?

Applied Ethicists

Normative ethics

Role = function

Sociologists

Descriptive ethics

Role = ??

In Sociology...

A set of normative behaviors that are *expected* to be *consistently performed* by a given person in that role

Comes from an early theory of Erving Goffman called, the **participation framework** (consistently used in T&I research from the 1980s to today)

Tell one person what the other said in another language

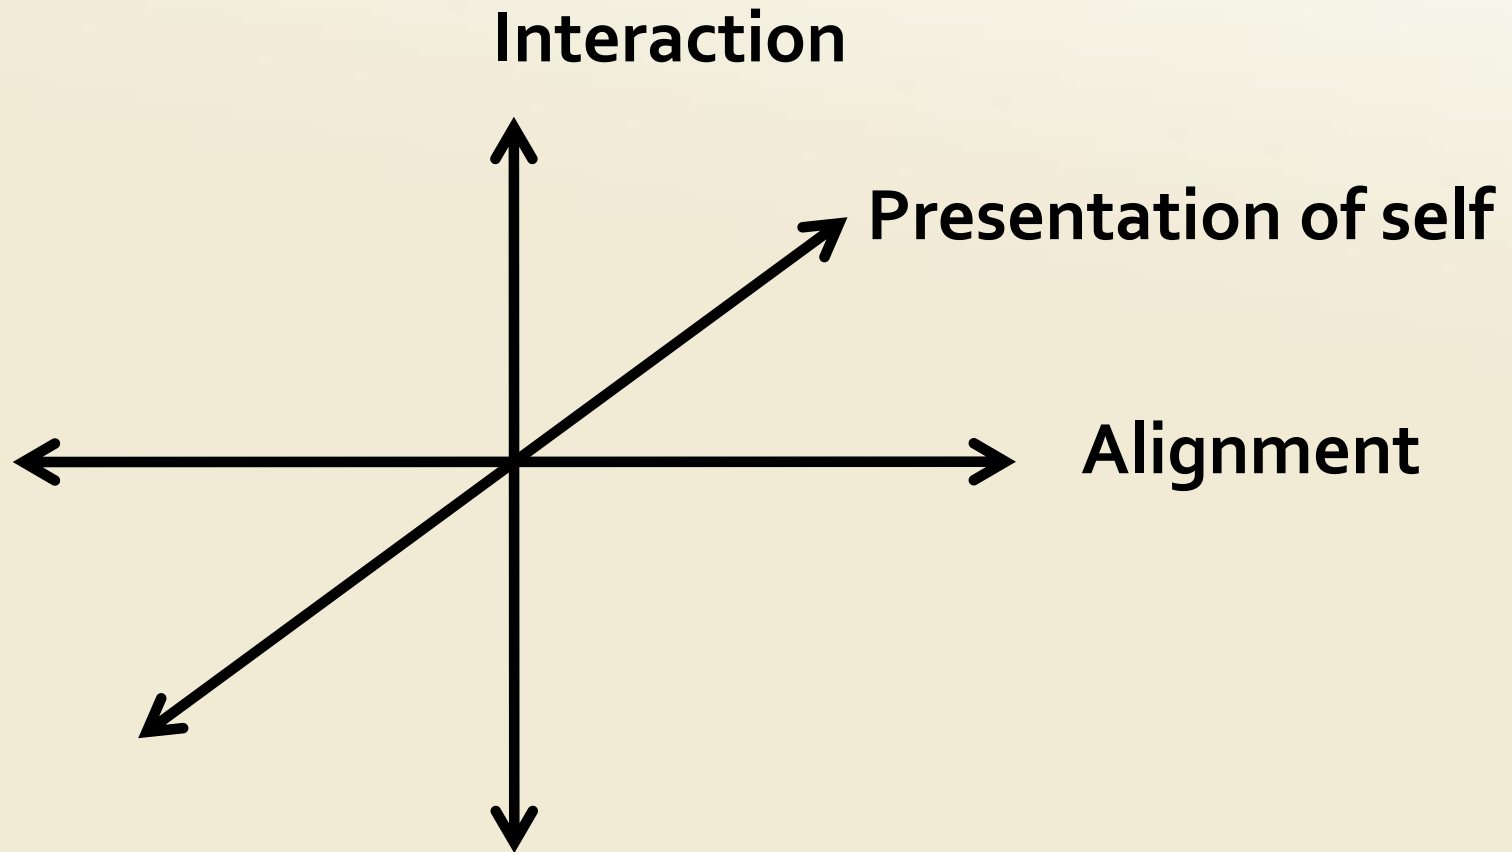

The interpreter's function

Our use: sociological or applied ethics?

- Angelleli (2006) : “[**role** is]...one of the most problematic issues”
- Fritsch-Rudser (1993): “Interpreters don’t have a problem with ethics, they have a problem with the **role**”
- Valero-Garces and Martin (2008), “...in most of the publications on community interpreting, there is one burning issue which appears constantly. It is that of the interpreter’s **role**”

Role Space: Llewelyn-Jones & Lee

All of these terms come from **descriptive ethics**

Descriptive ethics discovers and explains
(metaphor is a typical tool)

Normative ethics evaluates
(weighing consequences is a typical tool)

Using the wrong constructs to evaluate

Descriptive Ethics

Normative Ethics

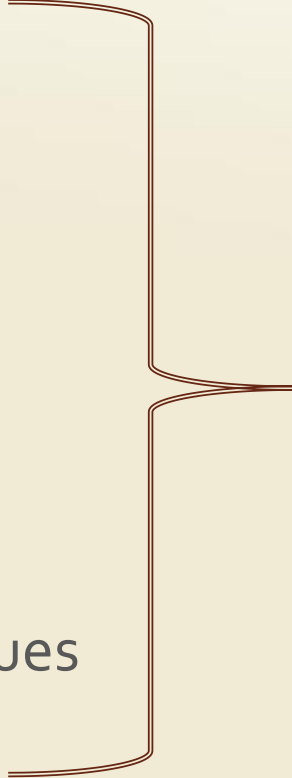

Trying to advance ethical thought...

The constructs in normative ethics

- Rules
- Values & principles
- Consequences
- Responsibility
- Incommensurable values

Require thinking to evaluate the behavior with consideration of...

How we *should* articulate “not my role”

- Rule = What is the rule aligned with this and does it apply
 - Interpreters do not participate
- Value = Interpreters should not practice outside their area of expertise
- Consequences = What are the consequences of the behavior to the service-users
- Responsibility = I am responsible for ensuring effective communication
- Incommensurable values = what value is forfeited and what value is prioritized

Metaphors belong in the bin?

Recycling
Metaphors

Conceiving of them in normative ethics

Adaptation: Metaphor to Value

Metaphors

- Conduit
- Team member
- Cultural mediator

Values

- Autonomy / agency
- Self-determinacy
- Values of the setting
- Transparency
- Attending to unrecognized components of communication unique to individual or group

Conduit Metaphor = Autonomy

Respecting another's autonomy

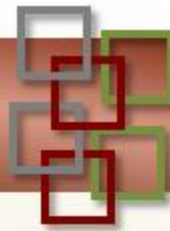

+

-

Member of the Team

Common values in healthcare

- Non-maleficence and beneficence
 - Do no harm & do good
- Rationing limited resources
- Patient partnership, education, and compliance
- Informed consent
- Not practicing outside of one's area of expertise

Values-based Ethical Reasoning

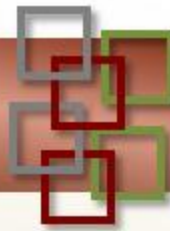

Typical Values of Interpreting

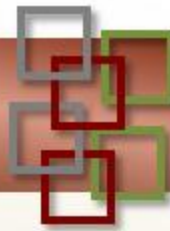

- Accuracy
- Neutrality
- Confidentiality
- Fidelity (Truthfulness)
- Respect for consumers & colleagues
- Professionalism

For 12 September

- What would a prototype of an ethical document look like?
- How does the metaphor of ally fit in?
- How can we create a normative ethics protocol that reflects the importance of cooperation?

Summary

- Ethicists make the distinction between normative and non-normative ethics (descriptive and meta-ethical).
- Sociologists and sociolinguistics aim to be descriptors ('is') and not offer prescriptions ('should').
- Interpreting has been heavily influenced by sociologists and sociolinguistics which is helpful for *descriptive ethics*.
- Descriptive ethics *should inform* normative ethics but can't be bound by the language or the tools of description. These need to be transformed into the language and tools of normative ethics.
- There is literature on normative ethics and descriptive ethics but very little on meta-ethics.
- Interpreting literature and ethical content material use descriptive ethics to convey norms. Research is showing that this isn't working...
