Computer Labs

Computer labs follow the same S25 and NonS25 rules as regular classrooms on campus. S25 spaces are open to all scheduling after the first week of classes has concluded, and open in Finals Week after the fourth week of classes has concluded. Summer term is the exception to these rules, in that it opens to all scheduling on February 1st each year. NonS25 spaces are governed by the Departments. Any reservations in these spaces must be approved by the Department associated with that space. The type of NonS25 room clues schedulers to how the room is scheduled.

Did you know that students and instructors can now access almost all UNC software from ANY computer? Apporto is an application that allows the use of remote lab technologies and can be loaded on virtually any computer, on or off campus. Why is this important to schedulers? Because it may no longer be necessary to put a class in a specific space just to utilize a designated software.

How does Apporto work?

- 1) Visit this link: <https://unco.apporto.com>
- 2) Instructors will log-in with their regular unco.edu credentials, and students will sign in with their bears.unco.edu credentials
- 3) Click on the "Launch" button under the "Virtual Desktop"
- 4) From the virtual desktop, find the software needed and double click that icon to activate the chosen program.
- 5) When finished, remember to save all work and close the software. Then exit the session by using the window icon on the bottom of the Apporto desktop screen.

Visit this link to find out what software can be accessed using Apporto, and for other useful information about Apporto:
