This four-year plan is a recommended schedule to complete your bachelor's degree in 4 years. Every UNC student must meet the following requirements in order to graduate with a bachelor's degree: earn a minimum of 120 semester credit hours; possess a minimum of a 2.00 cumulative grade point average; have at least 31 credit hours in courses designated as Liberal Arts Curriculum; meet all degree requirements in the student's major field of study. Each major and/or concentration may have additional requirements necessary for graduation. **Students must consult with their major advisor to receive information on any additional graduation requirements.**

**Admission Requirement** – No separate admission requirement.

**Minor Required** – No Minor required.

## BS Mathematics, Pure & Applied Concentration (cont.)

### Notes

- <sup>a</sup> MATH 495 is only offered every odd-numbered fall; MATH 431 is only offered every odd-numbered fall; and MATH 460 is only offered every even-numbered spring.
- <sup>b</sup> Liberal Arts Curriculum courses can be taken any semester. It is strongly suggested that they be evenly distributed over the entire 4 years of study rather than concentrated in the first 2 years. NOTE: You need to complete 31 Liberal Arts Curriculum credits total. Math 131 and Math 132 are required in the program and also satisfy the 3 credit Liberal Arts Curriculum Mathematics requirement. Most students will take ENG 122 for their first composition class unless they have placed out of the introductory composition requirement. Students need to take 6 credits total of composition courses, 7 credits of natural and physical sciences credits, and 15 credits from Arts & Humanities, History, Social & Behavioral Sciences, U.S. Multicultural, and International Studies. Of these 15 credits, one must be designated as a Multicultural Studies [MS] class, and one must be designated as an International Studies [IS] class.
- <sup>c</sup> You need to complete 36-37 credits of University-wide Electives.
- <sup>d</sup> You need to complete 12 additional credits from the concentration electives. Choose from: MATH 322, 336, 341, 342, 351, 375, 391, 432, 437, 495 (under second title); CS 301, 302, 350, 454, 456, 460; STAT 411, or 451.
- Courses in **bold** are Mathematical Sciences Core courses.
- Courses in *italics* are Concentration requirements

The Pure & Applied Concentration permits students to acquire the standard concepts of undergraduate mathematics including calculus, real and complex analysis, differential equations, linear and abstract algebra, discrete mathematics, probability, and statistics. The concentration also focuses on applications of mathematics to real-life problems and includes some supporting computer science and statistics. Graduates will be prepared to enter a graduate program in mathematics or some other related discipline. They may also begin a career in a wide variety of quantitative settings, including branches of engineering, physical and social science, environmental, governmental, industrial, military, finance and management, law, and medicine.
