

UNC ANIMAL USE PROTOCOL
ATTACHMENT J – ANTIBODY PRODUCTION

The use of animals for antibody production is considered to be a potentially painful procedure. *In vitro* alternatives exist in many cases though they may be more costly or time-consuming. A written justification is required for the use of animals for generation of antibodies in lieu of *in vitro* methods.

J.1. JUSTIFICATION:

J.2. PROCEDURES:

Specify the UNC IACUC SOP for antibody production [SOP not yet developed. Until it is, please describe here the procedures you will employ.] that will be followed:

If you will not be following UNC IACUC Standard Operating Procedures for Antibody Production, provide a justification for not doing so, and describe in detail the procedures to be used.
