Featured Funding Opportunity

Consider an NSF EAGER Proposal

Have an idea that doesn't exactly fit any NSF program? A new approach? A risky but potentially high-reward venture? Consider an EAGER proposal.

Consider this mechanism for funding right now!

The NSF's EAGER mechanism is designed for early-stage, exploratory research ideas that are untested but have the potential to be transformative. Here's what you need to know:

- **EAGER** is ideal for high-risk, high-reward projects—whether disciplinary or interdisciplinary.
- Up to \$300,000 can be requested for projects lasting up to 2 years.
 Unlike RAPID, EAGER isn't meant for urgent work, but rather for bold, innovative
- Because EAGER proposals do not require external review, they may be especially attractive as NSF looks to obligate FY25 funds by September.

If you've been thinking about a novel idea, now is a great time to reach out to your program officer and start drafting!

This Week's New Funding Opportunities

Bureau of Land Management:

National Conservation Lands Program

Application Deadline: July 11, 2025

The Bureau of Land Management (BLM) is accepting proposals under its Management Studies Support Program. This initiative, part of the National Conservation Lands program, provides funding for studies that deepen our understanding of the resources on BLM lands, the values they protect, and the impact of current management strategies. The program emphasizes collaborative conservation by partnering with universities, state and local agencies, tribal governments, and nonprofit organizations. These partnerships aim to produce actionable data and insights that inform BLM's land management decisions, support citizen science efforts, and advance tribal co-stewardship initiatives.

For additional information, please click here.

OSERS: OSEP: Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities and Demonstration and Training Programs

Application Deadline: July 18, 2025

The U.S. Department of Education's Office of Special Education Programs (OSEP) is offering funding to establish a National Technical Assistance Center on Transition for Students and Youth with Disabilities. This grant aims to improve outcomes for individuals with disabilities by supporting the development and dissemination of evidence-based practices, technical assistance, and model demonstrations. The center will help build state and local capacity to support successful transitions from school to postsecondary education, employment, and independent living. Funded projects must align with current federal priorities, demonstrate strong management and evaluation plans, and ensure all materials developed are openly licensed and accessible.

For additional information, please click here.

U.S. Department of Agriculture: Regional Food System Partnerships

Application Deadline: Accepted Anytime

Horizon Europe is the European Union's main program for supporting research and innovation through 2027. It funds projects that aim to tackle climate change, improve public health, and strengthen Europe's economy and global competitiveness.

Key Features

cooperation.

- Focus on Collaboration: Encourages partnerships among countries, industries, and researchers.
- Mission-Driven: Targets real-world challenges like cancer, climate adaptation, clean oceans, smart cities, and healthy soil.
 Support for Innovation: Helps ideas with high potential that may be too risky for
- private investors.
 Open Access: Research results must be shared openly.
 Inclusive Participation: Supports widening participation and building research
- Inclusive Participation: Supports widening participation and building research strength across Europe.
 Global Outlook: Welcomes participation from outside the EU through international
 - For information about the application process, **please click here.**

National Science Foundation: Designing Accountable Software Systems (DASS)

Application Deadline: Accepted Anytime

Synopsis

Society is becoming highly dependent on software applications, systems, and platforms, as functionality in all aspects of business, government, and everyday life is increasingly implemented through software. At the same time, there has been an increase in the laws and regulations whose implementation and effectiveness depend on software. Whereas organizations and individuals throughout our history have been expected to comply with laws and regulations, now software systems also must be accountable and comply with them. Software systems need to be designed with legal and regulatory compliance in mind, and should be adaptable to changing laws and regulations, which themselves evolve with changing citizen expectations and social norms.

The Designing Accountable Software Systems (DASS) program solicits foundational research aimed towards a deeper understanding and formalization of the bi-directional relationship between software systems and the complex social and legal contexts within which software systems must be designed and operate. The DASS program aims to bring researchers in computer and information science and engineering together with researchers in law and social, behavioral, and economic sciences to jointly develop rigorous and reproducible methodologies for understanding the drivers of social goals for software and for designing, implementing, and validating accountable software systems. DASS will support well-conceived collaborations between these two groups of researchers. The first group consists of researchers in software design, which, for the purposes of this solicitation, is broadly defined as formal methods, programming languages, software engineering, requirements engineering, and humancentered computing. The second group consists of researchers in law and the social, behavioral, and economic sciences, who study social systems and networks, culture, social norms and beliefs, rules, canons, precedents, legal code, and routine procedures that govern the conduct of people, organizations, and countries.

For additional information, please click here.

National Science Foundation: Research Grant Programs Findable Accessible Interoperable Reusable Open Science (FAIROS)

Synopsis

Application Deadline: <u>April 8, 2026</u>

The FAIROS Program seeks to support a broad range of transformative open science activities including but not limited to i.) Research, education, and socio-technical cyberinfrastructure development capacities that advance sustainable multi-disciplinary findable, accessible, interoperable, reusable (FAIR) research data management (RDM) and open science capabilities, ii.) Piloting new models of scientific communication and publication that improve efficiency and accessibility, iii.) Developing FAIROS data portals, research data commons, RDM as a national service, and iv.) Lowering barriers to accessing, curating, integrating, linking, managing, sharing, and storing data across many disciplinary domains, irrespective of data size.

The program supports innovation across the cyberinfrastructure (CI) ecosystem to address accessibility, data curation, research data management, discoverability, reliability, reproducibility, preservation, sustainability, and utility of research products, including data software, and code, developed as part of funded projects.

Cancelled Programs

ED Cancels Three FY 25 Fulbright-Hays

The National Endowment for the Humanities (NEH) recently opened a competition for the

Competitions

grants program, Public Impact Projects Celebrating America's 250th Anniversary. Created to mark the 250th anniversary of the signing of the Declaration of Independence, the grants will fund projects that engage the public with humanities scholarship focused "on the

Founding Era and the lasting impact of the people and events that propelled the Revolution." Awards can be used for a range of project types:

Collaborating with scholars and interpretive consultants to develop new interpretive plans. Implementing tours, exhibitions, or other public-facing interpretive programs.

Assessing the opportunities presented by your collections and other resources to tell compelling stories of the legacy of the Declaration of Independence.

Training staff and volunteers in new methods and best practices for public interpretation.

Grants Calendar & Upcoming Webinars

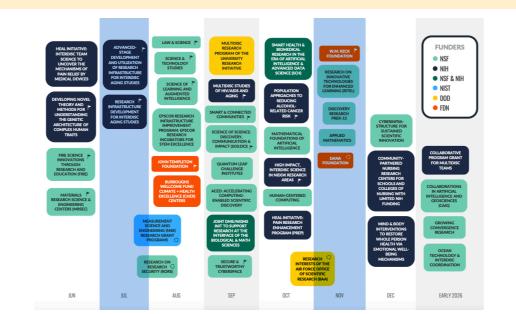

Hanover Grants Calendar

As part of Hanover's efforts to monitor the funding landscape and facilitate strategic planning, Hanover produces a bimonthly Grants Calendar centered on certain funding interests. This month's calendar reviews upcoming grant opportunities focused on Interdisciplinary research, covering a range of grantmakers. Short-term targets with set deadlines are included alongside longer-term opportunities expected to occur across the next year and beyond.

To access the interactive calendar with live inks, please click here.

Please note: Hanover has included relevant opportunities that continue to be advertised as of the publishing of this newsletter. Given ongoing developments in the federal funding landscape, grant seekers are advised to closely monitor the

status of programs and confirm guidance with program staff to confirm accuracy wherever possible.

Proposal Preparation for

Improving Undergraduate STEM Education - an American Association for the Advancement of Science Webinar

Monday, June 25, 2025 1:00 PM MT- Webinar #1 Tuesday, July 1, 2025 2:00 PM MT- Webinar #2

AAAS is offering a proposal preparation webinar to support applicants responding to the current NSF IUSE:EDU solicitation (NSF 23-510). Led by Dr. Travis York, Director of the Center for STEMM Education and Workforce (CSEW) at AAAS, the session will provide guidance on developing competitive proposals aligned with the latest NSF priorities.

As part of its commitment to fostering a more inclusive STEMM enterprise, AAAS may request optional demographic information to better understand how its programs serve the broader scientific community. This information is used only in aggregate and does not impact individual participation. Please note for those working on proposals for the upcoming IUSE solicitation deadline that all proposed projects must adhere to the most recent NSF

To register for **Webinar #1**, <u>please click here</u>. To register for **Webinar #2**, <u>please click here</u>.

Snapshot of Higher Education Campus Climate

Thursday, June 25, 2025 12:00 PM MT

Join Hanover for an exclusive look at the top findings from their 2025 National Campus Culture and Climate Survey. Hanover experts and higher education leaders will unpack how institutions are supporting student belonging, adapting to new regulations, and navigating today's political landscape—all while staying true to their mission. Attendees will gain:

- Actionable insights to inform strategic planning
- Real-world examples from peer institutions
 A clearer understanding of student needs and institutional responses

To register, please click here.

Federal Funding Priorities in FY 2026

Thursday, June 26, 2025 10:00 AM MT

The shift in presidential administrations has resulted in widespread changes for grant seekers at the federal level. In this webinar, Hanover will review key insights from our analysis of the FY 2026 budget request, providing information on major federal agency priorities along with details of individual grant programs or funding areas that may be impacted by the proposed changes. This session will focus primarily on insights relevant to higher education and secondary education.

Speakers include members of Hanover's Grants Team:
- Clinton Doggett - Senior Grants Advisor
- Mallory Waters - Grants Advisor

To register, please click here.

Funding Opportunities with Summer 2025 Deadlines

Alfred P. Sloan Foundation: Grants Program

Application Deadline: July 1, 2025 opsis

Synopsis
The Alfred P. Sloan Foundation supports original, high-quality research and education projects that advance knowledge in STEM and economics. Grants are awarded to individuals and organizations whose work aligns with the Foundation's mission to promote scholarly excellence and broaden public understanding in these fields.

The Foundation makes grants across a <u>wide range of topics</u>, including **STEM**, **economics**, **higher education**, **digital technology**, **public understanding of science**, **technology** & **economics**, **working longer**, **and energy and environment**. Award types and funding structures vary depending on the program and project scope.

For information about the application process, <u>please click here.</u>

To view previously funded projects, <u>click here.</u>

U.S. Department of Justice: Campus Program

Application Deadline: July 8, 2025

Synopsis

The Campus Program supports institutions of higher education in enhancing their ability to prevent, respond to, and educate about domestic violence, dating violence, sexual assault, and stalking. The program is designed to foster safer campus environments by strengthening institutional policies, victim services, investigative procedures, and prevention

Key goals of the Campus Program include:

 Strengthening Response Capabilities: Funding supports personnel, training, technical assistance, data collection, and equipment aimed at improving the apprehension, investigation, and adjudication of individuals committing acts of domestic violence, dating violence, sexual assault, and stalking on campus.

 Policy and Protocol Development: Institutions are encouraged to develop, strengthen, and implement comprehensive campus policies and protocols that identify and respond effectively to these crimes, including those involving the misuse of technology. The program also emphasizes training for campus administrators, security personnel, student conduct staff, and disciplinary board members to ensure investigations and disciplinary proceedings are prompt, fair, and impartial.

Prevention and Education Programming: The Campus Program supports the creation and delivery of ongoing, age-appropriate, culturally relevant prevention education. These efforts should be accessible and presented in multiple campus venues, addressing not only physical abuse but also technological abuse and reproductive and sexual coercion. The programming promotes respectful, nonviolent behavior as a campus norm and actively involves men in prevention efforts.

This initiative aims to create a coordinated campus response that is trauma-informed, survivor-centered, and grounded in best practices.

For additional information, please click here.

NEA Translation Project Fellowships 2026

Proposal Deadline: July 16, 2025

Through fellowships to published translators, the National Endowment for the Arts (NEA) supports projects for the translation of specific works of prose, poetry, or drama from other

languages into English. The work to be translated should be of interest for its literary excellence and merit.

NEA encourages translation projects that feature languages, perspectives, and writers that are not well represented in English, as well as work that has not previously been translated into English. fostering mutual support for the diverse beliefs and values of all individuals and groups.

For complete program information, please click here.

National Science Foundation: Human-Environment and Geographical Sciences Program (HEGS)

Application Deadline: August 1, 2025

Synopsis
The objective of the Human-Environment and Geographical Sciences Program is to support basic scientific research about the nature, causes, consequences, or evolution of the spatial dimensions of human behaviors, activities, and dynamics as well as their interactions with environmental and social processes across a range of scales.

Contemporary geographical research encompasses diverse research traditions and methodologies. Recognizing the breadth of the field's contributions to science, the HEGS Program welcomes proposals for empirically grounded, theoretically engaged, methodologically rigorous, and generalizable research that advances geographical and geospatial sciences.

Because the National Science Foundation's mandate is to support fundamental scientific research, the HEGS program cannot fund research that takes as its primary goal humanistic interpretations or findings that are not generalizable or reproducible. HEGS welcomes proposals that utilize quantitative, qualitative, or mixed methods in novel ways. However, a proposal that applies geographical or geospatial methods to a geographic problem without proposing how that problem provides an opportunity to make a theory-testing or theory-expanding contribution to geographical science, broadly defined, will be returned without review. HEGS supported projects are expected to yield results that will enhance, expand, and transform fundamental geographical theory and geospatial methods and that will have broader impacts that benefit society.

For additional information, please click here.

National Endowment for the Humanities: Public Humanities Projects

Application Deadline: August 13, 2025

The Public Humanities Projects program supports projects that bring the ideas of the humanities to life for general audiences through public programming. Projects must engage humanities scholarship to analyze significant themes in disciplines such as history, literature, ethics, and art history. Awards support projects that are intended to reach broad and diverse public audiences in non-classroom settings in the United States. Projects should engage with ideas that are accessible to the general public and employ appealing interpretive formats.

Public Humanities Projects supports projects in three categories (Exhibitions, Historic Places, and Humanities Discussions), and at two funding levels (Planning and Implementation). Proposed projects may include complementary components: for example,

For additional information, please click here.

a museum exhibition might be accompanied by a website or mobile app.

National Endowment for the Humanities: Media Projects

Application Deadline: August 13, 2025

The Media Projects program supports the development, production, and distribution of radio programs, podcasts, documentary films, and documentary film series that engage general audiences with humanities ideas in creative and appealing ways. Projects must be grounded in humanities scholarship and demonstrate an approach that is thoughtful, balanced, and analytical. Media Projects offers two levels of funding: Development and

For additional information, please click here.

Production.

Templeton Foundation Grants

Online Funding Inquiry Deadline: August 15, 2025

The Templeton Foundation invites you to submit your project idea through an Online Funding Inquiry (OFI). The Foundation offers grants in support of research and public engagement in their major Funding Areas. They invest in bold ideas from contrarian thinkers — ideas that cross disciplinary boundaries and challenge conventional assumptions. And they fund innovative programs that engage the public with these ideas, in an effort to open minds, deepen understanding, and inspire curiosity.

For additional information, please click here.

National Endowment for the Humanities: Public Impact Projects Celebrating America's 250th Anniversary

Online Funding Inquiry Deadline: August 15, 2025

2026 marks the 250th anniversary of the signing of the Declaration of Independence. In recognition of this milestone NEH will award grants to assist cultural organizations in expanding the scope, reach, and excellence of public programs that examine the founding of the nation and the significance of the Declaration of Independence. Public Impact Projects Celebrating America's 250th Anniversary support projects that focus on public interpretation of the Founding Era and the lasting impact of the people and events that propelled the Revolution. Supported activities must be designed to connect audiences to the ideas of the American Revolution through the synthesis of scholarship from fields in the humanities and may include:

Collaborating with scholars and interpretive consultants to develop new interpretive plans Implementing tours, exhibitions, or other public-facing interpretive programs

Assessing the opportunities presented by your collections and other resources to tell compelling stories of the legacy of the Declaration of Independence

Training staff and volunteers in new methods and best practices for public interpretation

For additional information, please click here.

Gerber Foundation:

Pediatric Research

Application Deadline: August 15, 2025

Synopsis

The Foundation's mission focuses on infants and young children. Accordingly, priority is given to projects that improve the nutrition, care and development of infants and young children from 0-3 years of age.

The Foundation is particularly interested in fresh approaches to solving common, everyday problems or emerging issues within our defined focus area. Projects should focus on issues faced by care providers that, when implemented, will improve the health, nutrition and/or developmental outcomes for infants and young children. The board is particularly looking for practical solutions that can be easily and rapidly implemented on a broad scale with a predictable time frame to clinical application.

The Foundation is looking for projects that will result in 'new' information, treatments or tools that will result in a change in practice. The board rarely funds projects that are focused on sharing current information with parents or caregivers.

For additional information, please click here.

Funding Opportunities With Flexible Deadlines

National Institute of Standards and Technology: Measurement Science and Engineering (MSE)

Application Deadline: Accepted Anytime

Research Grant Programs

The mission of the Information Technology Laboratory (ITL) is to cultivate trust in information technology (IT) and metrology and is accomplished using its world-class measurement and testing facilities and encompassing a wide range of areas of computer science, mathematics, statistics, and systems engineering.

The ITL Grant Program provides financial assistance to support the conduct of research or a recipient's portion of collaborative research consistent with the ITL's missions to support research in the following fields: Applied and Computational Mathematics, Artificial Intelligence, Big Data Analytics, Internet of Things (IoT), Metrology Infrastructure for Modeling and Simulation, and Statistical Design, Analysis, and Interpretation.

Financial support may be provided to attend education and outreach programs, conferences, workshops, or other technical research meetings that are relevant to the mission of the ITL. Financial support may also be provided to organizations sponsoring conferences, workshops, or other technical events that are relevant to the mission of the

For additional information, please click here.

National Science Foundation: Education and Broadening Participation in Earth Sciences

Application Deadline: Full Proposals Accepted Anytime

The Division of Earth Sciences' Education and Broadening Participation Program (EBP) facilitates activities that engage a wide range of audiences in Earth Sciences research efforts, which are:

Research Experiences for Undergraduates and Teachers: This program provides funding to academic institutions that allows them to offer summer internships to undergraduate

programs. EAR EBP prioritizes co-funding of CAREER awards that include a focus on broadening participation in the geosciences. 4) Unsolicited ("ad hoc") Proposals: Creative efforts to support recruitment and retention of talented individuals in Earth sciences are also supported as "ad hoc" proposals submitted through EAR Education & Broadening Participation. Pls are advised that they must submit a concept outline prior to submission of an ad hoc EBP proposal. This will aid in determining the appropriateness of the work for consideration by this program. Outlines should be submitted by email to a cognizant program officer. For additional information, please click here. **Henry Luce Foundation:** Democracy, Ethics, and Public Trust (DEPT) Initiative Application Deadline: Full proposal Accepted Anytime The Democracy, Ethics, and Public Trust Initiative supports projects in three key areas: Information Ecosystems, Communities and Governments, and Confidence in Democracies. Grants for Communities and Governments focus on improving the responsiveness of public officials and the effectiveness of policies and services, particularly at the regional level. Funding also supports efforts that empower citizens and communities to participate actively in decision-making, policy development, and resource allocation. Confidence in Democracy grants recognize that thriving citizens are essential to a healthy democracy. These grants support initiatives that strengthen public trust by improving access to education, healthcare, economic opportunities, and safe environments. Funding is also available for innovative journalism and media projects that enhance news gathering, reporting, and audience engagement, as well as efforts to create more equitable and inclusive digital spaces. For additional information, please click here. **National Science Foundation:** Infrastructure Systems and People (ISP) Application Deadline: Full proposal Accepted Anytime Infrastructure systems comprise complex connections between physical components, organizational structures and operational methods that support the needs of people and communities at the local, regional, national, and global scales. Such systems form the backbone of society, providing essential services as well as ensuring public health and welfare, economic prosperity and national security, and are expected to function under all operational conditions. The program particularly encourages interdisciplinary and multidisciplinary exploration that will open new research frontiers and significantly broaden and transform relevant research communities. The program welcomes research that addresses novel system integration, user-inspired system and service design, data analytics, and socio-technical studies focused on engineering and system innovation during normal and extreme conditions. The program also values innovative research efforts focused on collecting, standardizing, and sharing large-scale databases of real-world infrastructure systems and peopleinfrastructure interactions during normal and extreme operating conditions, which can be instrumental in providing benchmarks for model verification and validation and for advancing future research innovation in ISP. For complete program information, please click here. **National Science Foundation DCL: Amplifying STEM Education Investments in and with Rural and Remote Areas and Communities** Application Deadline: Full proposal Accepted Anytime EDU recommends that proposers interested in responding to this DCL visit the Division webpages listed below* that aligns most closely with their work. Within each Division you will find several programs that could align more specifically with your area of interest. Each program lists Program Officers and direct program e-mails; therefore, NSF welcomes and encourages your inquiries to the relevant program before submission. This DCL encourages proposals that support STEM education, research, and workforce ecosystems with and for learners, formal and informal educators, researchers, and local industry in and with rural and remote communities. Rural community members should be at the center of proposals responding to this DCL, reflected in project leadership and research positions, proposal conceptualization, decision-making and implementation, interpreting and communicating findings, and budget allocation. This DCL strongly encourages proposals from institutions of higher education, including two-year and community colleges, community-based organizations, informal STEM institutions, and non-profits located in rural and remote communities, in accordance with eligibility statements in each program's solicitation. All proposers are encouraged to explore a wide range of fundamental and applied research and development projects and partnerships that may address one or more of the following EDU goals: Prepare the next generation of STEM professionals and attract and retain more rural Americans to STEM careers. Develop a robust research infrastructure and community that can conduct rigorous research and evaluation to support excellence in rural STEM education and that integrates research and education. Increase and improve the technological, scientific, and quantitative experiences of rural Americans so that they can successfully participate in every realm of citizenship, living productive lives in an increasingly technological society. Broaden participation throughout rural and remote geographic regions inclusive of individuals, types of institutions, and STEM careers. Expand outcomes of STEM education and training modalities, including informal STEM and online learning, for rural and remote students at the preK-12, undergraduate and graduate, and workforce levels. Address grand challenges and needs underlying STEM educator shortages in rural and remote communities, especially at the preK-12 and the two-year and community college levels. *The Divisions and their webpages are: • Division of Equity for Excellence in STEM (EES) - Division webpage. Division of Research on Learning in Formal and Informal Settings (DRL) - Division • Division of Undergraduate Education (DUE) - Division webpage. Division of Graduate Education (DGE) - Division webpage For complete program information, please click here. **National Science Foundation:** Geosciences Facility and Instrumentation Request Process (FIRP) Proposal Deadline: Full proposal accepted anytime The Facility and Instrumentation Request Process (FIRP) solicitation describes the mechanism by which the research community can propose projects that require access to instrumentation and facilities sponsored by the Facilities for Atmospheric Research and Education (FARE) Program in the Division of Atmospheric and Geospace Sciences (AGS). FARE provides funding to a variety of organizations to make specialized instrumentation and facilities available to the atmospheric science research community through the Lower Atmosphere Observing Facilities (LAOF) and the Community Instruments and Facilities (CIF) programs. FIRP allows for parallel evaluation of intellectual merit and broader impacts along with the feasibility of the proposed project. All proposals to AGS that require the use of FARE-sponsored assets must be submitted through this solicitation. The FIRP solicitation offers three proposal submission tracks based on the type and purpose of the request: Track 1 - Education and Outreach. Track 2 - Single Facility Request. Track 3 - Field Campaigns. For complete program information, please click here. **Funding Opportunities with** Fall 2025 & Early 2026 Deadlines

students and opportunities for teachers who would like to participate in earth sciences

2) <u>EAR Postdoctoral Fellowships</u>: The Division of Earth Sciences (EAR) awards 2-year Postdoctoral Fellowships to highly qualified investigators within 24 months of obtaining their

PhD to carry out an integrated program of independent research and professional

3) <u>Faculty Early Career Development (CAREER)</u>: This program supports pre-tenure researchers who would like to combine their research efforts with excellent educational

related research efforts.

development.

Kress Foundation: History of Art,

Conservation, and Digital Art History Grants

Application Deadline: September 1, 2025 & December 15, 2025
Synopsis

• History of Art Grants -Fall & Winter Deadline
The History of Art Grants program supports scholarly projects that will enhance the appreciation and understanding of European works of art and architecture from antiquity to the early 19th century. Grants are awarded to projects that create and disseminate specialized knowledge, including archival projects, development and dissemination of scholarly databases, documentation projects, museum exhibitions and publications, photographic campaigns, scholarly catalogues and publications, and technical and scientific studies. Grants are also awarded for activities that permit art historians to share their expertise through international exchanges, professional meetings, conferences, symposia, consultations, the presentation of research, and other professional events.

Conservation Grants- Fall & Winter Deadline

The Conservation Grants program supports the professional practice of art conservation, especially as it relates to European works of art from antiquity to the early 19th century. Grants are awarded to projects that create and disseminate specialized knowledge, including archival projects, development and dissemination of scholarly databases, documentation projects, exhibitions and publications focusing on art conservation, scholarly publications, and technical and scientific studies. Grants are also awarded for activities that permit conservators and conservation scientists to share their expertise with both professional colleagues and a broad audience through international exchanges, professional meetings, conferences, symposia, consultations, the presentation of research,

 Digital Art History Grants- Fall Deadline The Digital Art History Grants program is intended to foster new forms of research and collaboration as well as new approaches to teaching and learning. Support may also be offered for the digitization of important visual resources (especially essential art history photographic archives) in the area of pre-modern European art history; of primary textual sources (especially the literary and documentary sources of European art history); for promising initiatives in online publishing; and for innovative experiments in digital art history. For additional information, please click here. **National Science Foundation:** Science of Science: Discovery, Communication and Impact (SoS:DCI) Application Deadline: February and September (annually) Upcoming Deadline: September 9, 2025 Synopsis
The National Science Foundation's Science of Science: Discovery, Communication and Impact program supports innovative research that enhances understanding of how science is conducted, communicated, and applied to generate public value. This program builds on the former Science of Science and Innovation Policy initiative and promotes interdisciplinary approaches that inform evidence-based decision-making and policy. SoS:DCI invites proposals that apply rigorous empirical methods to advance theory and knowledge in three core areas: Scientific Discovery: Investigating the social and structural factors that shape scientific innovation and knowledge production. Scientific Communication: Developing theories, models, and data to better understand how science is shared within the research community and with the public. Societal Impact: Examining how scientific activity informs public policy, contributes to societal well-being, and creates measurable public value. The program welcomes studies conducted at multiple levels—from individual researchers and organizations to broader institutional and systemic frameworks. It encourages micro, meso, and macro-level research, as well as analyses of complex systems that shape scientific progress. Key expectations for proposals include: Drawing from and advancing established theories and conceptual frameworks within the science of science. • Creating models, data, and tools that support transformative—not incremental advancements. Including credible strategies for assessing project impact, with clear articulation of potential social and policy implications Demonstrating a commitment to open science through robust data management and public access to high-quality, reliable research outputs. Proposals that explore ways to strengthen and diversify the U.S. scientific workforce, promote high-impact discovery across sectors, and enhance national competitiveness are of particular interest. The program places strong emphasis on interdisciplinary collaboration and convergent research that bridges multiple domains. For additional information, please click here. William T. Grant Foundation: Institutional Challenge Grant Application Deadline: September 15, 2025 The grant requires that research institutions shift their policies and practices to value collaborative research. Institutions will also need to build the capacity of researchers to produce relevant work and the capacity of agency and nonprofit partners to use research. We welcome applications from partnerships in youth-serving areas such as education, justice, prevention of child abuse and neglect, foster care, mental health, immigration, and workforce development. We especially encourage proposals from teams with African American, Latinx, Native American, and Asian American members in leadership roles. The partnership leadership team includes the principal investigator from the research institution and the lead from the public agency or nonprofit organization. For additional information, please click here. **National Endowment for the Humanities:** Summer Stipends

exhibitions that include a prominent focus on materials and techniques, and other

professional events.

Application Deadline: September 17, 2025 The National Endowment for the Humanities' Summer Stipends program aims to stimulate new research in the humanities and its publication. The program works to accomplish this

 Providing small awards to individuals pursuing advanced research that is of value to humanities scholars, general audiences, or both Supporting projects at any stage of development, but especially early-stage research and late-stage writing in which small awards are most effective Funding a wide range of individuals, including independent scholars, community

college faculty, and non-teaching staff at universities

Summer Stipends support continuous full-time work on a humanities project for a period of two consecutive months. NEH funds may support recipients' compensation, travel, and other costs related to the proposed scholarly research.

For additional information, please click here.

William T. Grant Foundation: Scholars Program

Application Deadline: September 17, 2025

The William T. Grant Scholars Program supports early-career researchers looking to expand their expertise into new disciplines, methods, or content areas. The program provides mentoring and a collaborative academic environment to encourage scholars to take meaningful steps in their research development.

Focus Areas

 Reducing Inequality Supports research on policies, programs, and practices that reduce disparities in academic, social, behavioral, or economic outcomes for young people (ages 5-25) in the United States. Emphasis is placed on addressing systemic racism and structural inequities. Improving the Use of Research Evidence

Encourages studies on how research can be better utilized by decision-makers to improve youth outcomes. This includes identifying strategies to enhance the impact and effectiveness of research in policy and practice.

The program seeks researchers with a strong track record who are committed to making a significant shift in their work while addressing critical social issues.

For additional information, please click here.

National Institutes of Health: **Bidirectional Influences Between Adolescent Social Media Use and Mental Health**

Proposal Deadline: October 21, 2025

Adolescents have increasing access to and spend an increasing amount of time engaging in online social interactions and consuming content on social media platforms. Yet there is limited knowledge of how online social behavior and experiences interact with adolescent mental illness and risk for psychopathology. The purpose of this notice of funding opportunity (NOFO) is to encourage applications that focus on understanding bidirectional relationships between social media use and adolescent mental illness, psychiatric symptoms, and risk or resilience for psychopathology, as well as social media as a platform for facilitating the identification of adolescents with or at risk for mental illness, for encouraging appropriate mental health service use, and for delivering preventive and therapeutic interventions.

For complete program information, please click here.

National Science Foundation: Applied Mathematics

Application Deadline: November 1, 2025

The Applied Mathematics program supports research that addresses challenges in science and engineering through innovative mathematical approaches. Successful proposals should demonstrate both mathematical creativity and a significant impact on real-world applications. Supports projects that advance mathematical methods to solve problems in science and engineering. Encourages proposals that provide rigorous training opportunities for early-career applied mathematicians. Open to a range of projects, from individual investigators to interdisciplinary team collaborations. Researchers developing novel mathematical frameworks with broad applications are strongly encouraged to apply.

For additional information, please click here.

National Historical Publications & Records Commission: Archival Projects

Application Deadline: November 5, 2025

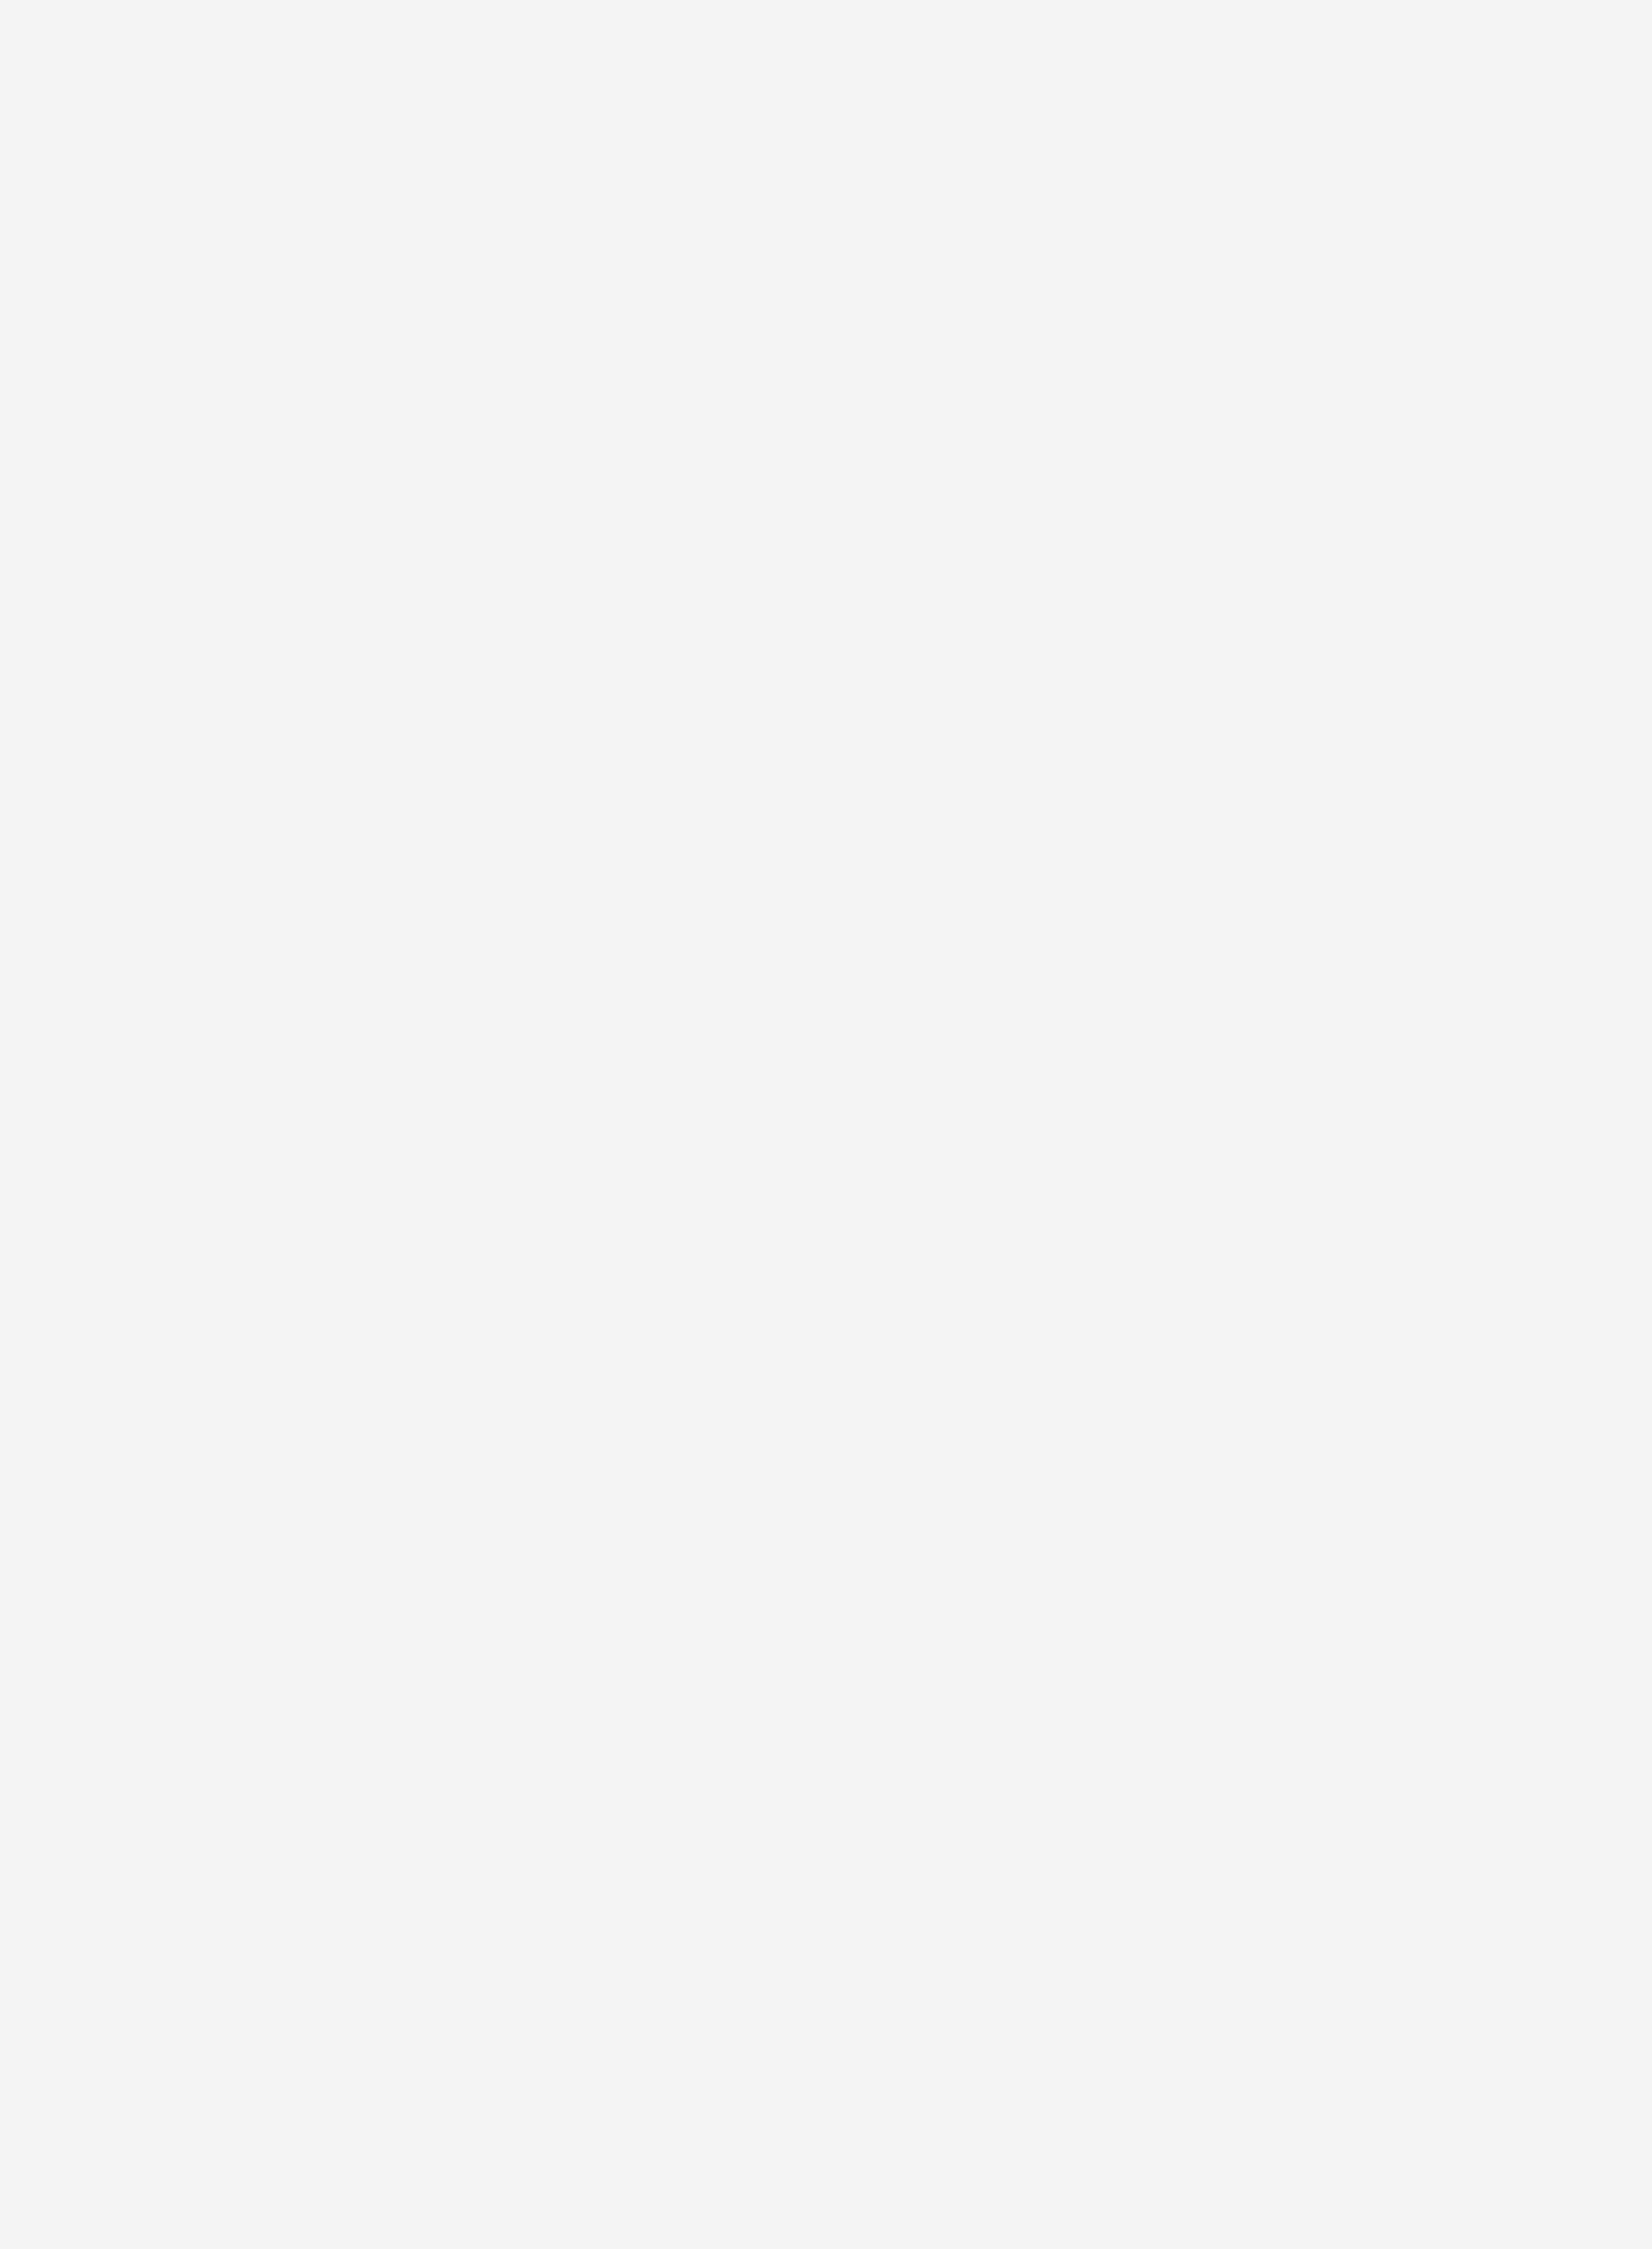

The NHPRC seeks archival projects that will significantly improve online public discovery and use of historical records collections. We welcome projects that engage the public, expand civic education, and promote understanding of the nation's history, democracy, and culture from the founding era to the present day. The Commission encourages projects focused on collections of America's early legal records, such as the records of colonial, territorial, county, and early statehood and tribal proceedings that document the evolution of

the nation's legal history. Projects may preserve and process historical records to:

 Arrange or re-house and describe collections Convert existing description for online access Create new online Finding Aids to collections

Digitize historical records collections and make them freely available online.

For additional information, please click here.

National Science Foundation: Major Research Instrumentation (MRI) Program: **Instrument Acquisition or Development**

Proposal Deadline: November 14, 2025

Synopsis
The Major Research Instrumentation (MRI) Program enhances access to advanced scientific and engineering instruments for research and training at universities and nonprofit organizations. Through MRI awards, institutions can acquire costly, multi-user instruments or develop new ones with advanced capabilities that push the boundaries of science and engineering. These grants are essential for enabling cutting-edge research

For complete program information, please click here.

that might not be possible otherwise and play a key role in training the next generation of scientists and engineers, equipping them with the skills to use and design the innovative

National Endowment for the Humanities: Preservation Assistance Grants for Smaller Institutions

Application Deadline: January 8, 2026

tools of the future.

Synopsis
The Preservation Assistance Grants for Smaller Institutions program focuses on foundational activities in preservation and management of collections, such as assessments, development of plans and policies, consultations with scholars and source communities, emergency preparedness, environmental monitoring, rehousing, format surveys and inventories, and training in preservation and collections management. Applicants may draw on the knowledge of consultants whose preservation skills and experience are related to the types of collections and the nature of the activities on which their projects focus. Within the conservation field, conservators usually specialize in the care of specific types of collections, such as objects, paper, or paintings. Applicants should choose a conservator whose specialty is appropriate for the nature of their collections. Similarly, when assessing the preservation needs of library, museum, or archival holdings, applicants should seek a consultant specifically knowledgeable about the preservation of

National Endowment for the Humanities: Sustaining Cultural Heritage Collections

Application Deadline: January 9, 2026

collections in these types of institutions.

Cultural institutions, including libraries, archives, museums, and historical organizations, face a complex challenge: to preserve humanities collections for future generations through environmentally sustainable preventive care strategies to reduce energy consumption and costs as well as to strengthen institutional resiliency in the face of a changing climate. Cultural institutions can accomplish this work most effectively through managing collections' environment, including aspects such as temperature, relative humidity, pollutants, and light; providing protective storage enclosures and systems for collections; and safeguarding collections from theft, fire, floods, and other disasters. By using environmentally sustainable methods, institutions reduce reliance on fossil fuels and ensure collections are better protected from current and future disasters.

NSF Collaborations in Artificial Intelligence and Geosciences (CAIG)

Application Deadline: February 4, 2026

Synopsis
The Collaborations in Artificial Intelligence and Geosciences (CAIG) program seeks to advance the development and adoption of innovative artificial intelligence (AI) methods to increase scientific understanding of the Earth system. The program supports projects that advance AI techniques and/or innovative uses of sophisticated or novel AI methods to enable significant breakthroughs in addressing geoscience research question(s) by building partnerships between experts in Al and Geosciences. The key characteristic of a CAIG project is its potential to both answer important geoscience questions and improve AI techniques while also bringing together experts from both the AI and geoscience fields.
